

Environmental policy

As one of the leading industrial suppliers in our region Kammarton Bulgaria takes its responsibilities as a corporate citizen very seriously. We consider environmental protection in general as the tasks where we should and can make contribution.

Kammarton Bulgaria seeks to establish and sustain a positive environmental legacy for the present and for future generations. In doing so, the company is committed to minimizing its overall impact on the environment while encouraging and activating environmentally responsible behavior on the part of employees, customers and business partners.

Specifically, Kammarton Bulgaria aims to conserve water, energy and ecosystems; to reduce greenhouse gas emissions; to minimize waste and to inspire its customers consciousness in support of environmental sustainability throughout the professional industrial solutions installed and supported by us. The company makes efforts to identify, measure and understand the direct and indirect impact of its operations and develop innovative and realistic solutions for mitigating those impacts. It also complies with, and in some cases exceeds all national and international environmental laws and regulations in effect.

Kammarton's Environmental Focus Areas:

- **Water and Energy Conservation**

Improve water and energy efficiencies in existing operations. Invest in new technologies and systems that enhance water and energy conservation. Include water and energy management as an integral part of planning for future projects to reduce the consumption of water and energy.

- **Greenhouse Gas Emissions Reduction**

Reduce harmful GHG emissions by identifying the sources and implementing solutions, including source elimination, efficiency improvement, minimizing transportation and other fuels, and increasing the use of clean fuels. Examine the supply chain to achieve improvement.

- **Waste Minimization**

Minimize waste in our operations and business activities and maximize recycling in all aspects. Dispose of waste conscientiously and creatively by making "reduce/reuse/recycle" the standard operating procedure. Incorporate waste reduction into the design of projects, activities' programs, and facilities; reducing waste through innovative product and system implementation, supply chain management, and end-of-life recycling.

Environmental protection is an integral part of our corporate strategy, which is aimed at long-term value creation; as well as an important part of the way we evaluate our business activities and performance. The company is committed to communicating regularly its progress in implementing the policies and achieving the targets that it has established.
