

vispa
EVO

Ideal for cleaning floors of small and medium, very cluttered spaces on surfaces smaller than 1.300 m²

Vispa EVO
Scrubbing version
with disc brush

Agility and power combined in an extremely compact scrubbing machine

Ideal for cleaning small and medium surfaces

- Simple and comfortable to use
- Easy to carry
- Cleans in small and cluttered spaces
- Ensures optimal cleaning results
- Extremely simple maintenance
- Compact dimensions
- Cleans in any direction without movement limits thanks to the parabolic squeegee
- Increases the level of surface hygiene
- Guarantees the drying of the floor in a few seconds

A single button, endless opportunities

Thanks to the simple, intuitive controls, it can be used straight away by even the least experienced operators.

Just press the start button to begin working with Vispa EVO.

Small in its dimensions, but not in its performance

The structure is in polyethylene, designed to protect all the mechanical parts and guarantee solidity and robustness.

Fitted with a powerful brush gearmotor of 440W

The squeegee and frame are made of aluminum, making it robust but at the same time lightweight.

Small in its dimensions, but not in its performance

Large wheels guarantee excellent stability and make it easier to transport

The pressure on the brush reaches 30 kg for optimum cleaning results even during heavy duty cleaning.

Small in its dimensions, but not in its performance

The parabolic squeegee which continuously follows the direction of the machine, even on bends, for perfect scrubbing and drying results in any direction.

Small in its dimensions, but not in its performance

The flow of detergent solution onto the brush is constant, thanks to a specific pump which allows the homogeneous distribution of the solution across the entire surface of the brush

Small in its dimensions, but not in its performance

The vacuum nozzle of the squeegee has been completely redesigned in order to grant even better suction performance.

Small in its dimensions, but not in its performance

The integrated battery charger (optional) enables Vispa EVO to be recharged anywhere, so time isn't wasted to reach a specific recharging point.

Excellent autonomy, for working up to 2 hours*

Full access to the battery compartment.

Small in its dimensions, but not in its performance

The height and tilt of the handlebars can be adjusted to guarantee the maximum comfort for the operator, even during extended use.

The handlebars can be completely closed towards the machine body, enabling the scrubbing machine to be put away even in a small space.

Small in its dimensions, but not in its safety

Vispa EVO is fitted with 2 dead man's levers to stop all its functions if the operator loosens his/her grip on the handlebars; this guarantees maximum safety, even in the event of unexpected stops.

Dimensions don't count when it comes to being great in saving resources and limiting consumption

Stop & Go

When the machine is temporarily idle, solution flow stops and the brushes are automatically held up, without the operator's help, so that consumptions are optimized, and wastes reduced. Pressing the dead man's levers, all the functions previously activated are once again restored.

Dimensions don't count when it comes to being great in saving resources and limiting consumption

Working in ECO Mode not only reduces energy consumption and lowers the noise level of Vispa EVO, but also boosts productivity by optimizing the use of water, detergent and the battery..

This function makes Vispa EVO the ideal scrubbing machine for use in sensitive environments and wherever there are people present.

Dimensions don't count when it comes to being great in saving resources and limiting consumption

Vispa Evo is the most advanced compact scrubbing machine of the Comac range, thanks also to the possibility to equip it with the Comac Fleet Care Light system for fleet management. Precisely because it's small, a scrubbing machine of these dimensions may often be used in a superficial manner, moved around or, in the worst-case scenario, stolen.

The CFC Light system ensures the solidity of the investment, allowing the remote control of the status of machines in the fleet - when and where each machine is being used, and by whom, and if maintenance is needed - to let you intervene promptly, avoiding machine downtime and costly maintenance.

Designed to be easy to use

Full visibility of the
solution level in the
scrubbing machine,
thanks to the
transparent indicator
on the side
of Vispa EVO.

Designed to be easy to use

Vispa EVO is ready to use in a very short time and the clean water filling operation is even faster thanks to the crevice with filter on the front-mounted hopper cap.

Designed to be easy to use

The squeegee rotates 180° and, when it's in the side position, maintenance and rubber blade replacements can be carried out quickly and easily

The parts requiring daily maintenance are distinguished by their yellow color. In this way, they are easy to identify from the operator.

Designed to be easy to use

The special drainage hose
that can be hooked up to the
front part of the scrubbing machine.

Designed to be easy to use

Quick, handy brush coupling and uncoupling: just press the dead man's levers three times then confirm uncoupling on the Vispa EVO display, to remove the brush.

Designed to be easy to use

Full access to components makes it easier to carry out both routine and extraordinary maintenance. The recovery tank has a handle so it's easier to lift it for emptying.

Comac Copyright

Ownership of the information and/or documents:

All information (by which we mean all data and information with the sole exception of that of common knowledge or which COMAC has disclosed without reserve) and all documents (drawings, photos, etc.) are the exclusive property of COMAC and their use does not mean there is any kind of acquisition of titles, property or exploitation of rights or licences except for the limited permission of use ruled by this document.

By way of example and, therefore, not limited to, such information and/or documents can be the following:

Marketing section:

high definition digital images for the implementation of commercial catalogues on paper or web sites, company trademarks, original graphical documents from which texts are taken (e.g. the descriptive notes), PDF documents and original documents in .ppt format.

Professional use of the data:

It is a known fact that the information and/or documents, subject of this commitment, are and will be used by the beneficiary exclusively for carrying out his professional business and, therefore, no specific laws regarding consumer protection are applicable.

Confidentiality:

The Party that benefits from the information or use of documents taken from or, in any case, part of the commercial documentation, shall use all such information and/or documents with maximum care solely for the purposes connected to execution of this contract with COMAC and shall:

keep such information and/or documents confidential except for those, due to their nature, which are to be disclosed (promo-advertising material etc.);

shall not divulge any information and/or document to its suppliers, collaborators or employees beyond what is strictly necessary so that they may fulfil their tasks concerning relations with COMAC and shall ensure that the suppliers, collaborators and employees that have access to the information and/or documents are, in turn, bound by a confidentiality commitment to the benefit of COMAC; shall not divulge any information to third parties without the prior written consent by COMAC; copy and/or in any other way reproduce any information or document without the prior written consent of COMAC; take all the necessary measures to protect confidentiality.

Returning information and/or documents:

Whilst maintaining exclusive ownership at all times, COMAC has the right, at any time, to ask in writing or by e-mail, that all the information and/or documents received be returned or no longer used and within the term of thirty days from receipt of this request, all the information and/or documents must be returned, including any copies, or destroy such information and/or documents and relative copies so as to prevent them from being recovered and COMAC must be given a written declaration certifying that the information and/or documents have all either been returned or destroyed.

This obligation to return, destroy or no longer use is set automatically in motion when the relationship is cancelled with COMAC for any reason whatsoever.

Applicable law, cancelling clauses and Court having jurisdiction:

The interpretation, integration, execution and the effects of this commitment will be governed by Italian law.

If one or more points of this agreement are cancelled it does not invalidate the remaining points.

All disputes will be put to the exclusive jurisdiction of the Verona Courts.
