

YTM SERIES DATASHEET

YTM Series is a high-tech cleaning robot. It is produced in accordance with field projects and is extremely fast, easy to use and practical. It can also be easily moved between the mobile transport platform and the panel stands or transported by hand.

Since the product information, descriptions and images in this document are used for promotional purposes, Robsys reserves the right to make changes and innovations in the information, descriptions and visual changes of the products without prior notice.

MECHANICAL FEATURES	
Application Area	Land Projects
Cleaning Performance (max.)	3000-6000 m ² / hour
Dimension (width*length*height)	1012 x A x 356 A = Brush length suitable for the project (3000-6000 mm)
Weight	90-120 kg
Cleaning Speed (max.)	20-30 m/min
Cleaning Tilt	0°- 35°
Ambient Operating Temperature	(-10°C) / (60°C)
Safety	Protection sensors (optional)

BRUSH FEATURES	
Brush Length	3000-6000 mm (Brush length suitable for the project)
Brush Type	Non-Scratch imported plastic bristle brush
Number of Brushes	1 main brushes
Brush Lifetime	1.000.000 m ²

USAGE FEATURES	
Water Consumption	1000 L/ hour (avg.)
Number of Personnel	3 persons
Cleaning Method	Wet cleaning
Control Method	Control panel
