

**DON'T
WORK
HARD,
WORK
SMART!**

SHERPA
MINI-LOADERS

WHY WE DO WHAT WE DO ...

We believe in the power of machines to ease heavy physical labour. That is why we have spent the past decades developing an extended range of mini-loaders and attachments. Our products contribute a lot to labour-friendly and efficient work environments in various industries. From heavy duties in the stables and green industry, to hard physical labour in (road) construction and demolition. Our machines are happy to take on any task and carry out it the fastest and most cost-effective way possible. Don't work hard, work smart! Together we can establish safe, durable and efficient working conditions for everyone.

The driving force behind our organization has remained the same. We develop machines and tools to make hard work easier, faster and more durable. That's in our DNA: What can be improved, will be improved. We think of new and often revolutionary solutions to accomplish our goals. That is why we are particularly proud to introduce our newest range of zero emission machines. We are ready for the future! Are you?

SHERPA MINI-LOADERS

**BATTERY
POWERED**

REVOLUTIONARY, ELECTRIC AND COMPACT

These electric machines are fully emission free, ergonomically optimized and particularly low-maintenance. The driver stands in a ergonomic position, with all control levers within hands reach. In addition, our full Z line-up is equipped with an adjustable footplate, hip protection and an improved control panel. All our electric models can work a full day on a full battery.

400 Ah
4 HP

SHERPA Z10

The Z10 is powered by a lead acid battery, and is switchable between two gears. A higher speed to cover long distances, and a lower speed to manoeuvre more precisely, save battery and work with extra lifting power. The Z series is ergonomically optimized and very maintenance-friendly.

13.5 / 18 Kwh
10 HP

SHERPA Z20

Our most powerful electric mini-loader: the Z20! As powerful as the Z30, yet completely emission free. This machine is only 76 centimetres wide and, of course, ergonomically optimized. Therefore the driver always stands in a relaxed position, with the full control panel within hand reach. The Z20 also has a hydraulic quick lock and two speeds: a fast speed to cover long distances and a slower speed to manoeuvre precisely. In addition, the machine is equipped with a unique energy saving system and a maintenance-free lithium-ion battery, which allows the machine to continuously work up to six hours. And if you can charge the battery for just one hour during your break, the machine lasts a full work day!

THE FUTURE IS ELECTRIC

Our goal is to provide sustainable and durable workspaces for everyone. By making heavy work easier, safer and more efficient, but also by taking the utmost account of the environment. Therefore our range has included fully electric skid-steer loaders for many years now, like the SHERPA 100 ECO and SHERPA 2speed. With these machine you'll benefit from the many advantages a SHERPA has to offer, without any harmful effects on the environment.

360 Ah
4 HP

SHERPA 100 ECO

Compact, fully electric and yet exceptionally powerful – the SHERPA 100 ECO is perfect for indoor duties in the construction and demolition industries, because our electric machines do the heavy work for you without having to worry about harmful emissions. Versatile, eco-friendly and revolutionary – the best for you, and the environment!

360 Ah
4 HP

SHERPA 100 2SPEED

An electric motor and two driving speeds – the SHERPA 100 2Speed is the perfect asset to any construction or demolition company. The 2speed is switchable between 2 driving speeds. Slow speed to save battery, manoeuvre precisely and have more lifting power. And high speed to travel long distances faster.

SHERPA MINI-LOADERS FUEL POWERED

VERSATILE AND POWERFUL

The latest introduced machines of our revolutionary Z-series: the SHERPA Z30, Z40 and Z50. Powered by a powerful petrol or diesel motor and therefore an absolute powerhouse. Like the rest of the series, these machines are ergonomically optimized, ensuring the driver to stand in the most ergonomic position possible. The SHERPA Z-series is the pinnacle of powerful comfort and undoubtedly the next step in working smart.

HONDA GX390
12 HP

SHERPA Z30

The SHERPA Z30 has a width of only 76 centimetres, therefore you will have no troubles manoeuvring this machine through narrow passages, like elevators, doors and garden gates. This makes the Z30 the ideal asset to any landscaper, agricultural worker and professionals in the green industry!

HONDA GX690
22 HP

SHERPA Z40

Wider and even more powerful than its little brother, the Z30. The SHERPA Z40 is 114 centimetres wide and strong enough to carry out all heavy tasks for you.

KUBOTA D902
25 HP

SHERPA Z50

The unquestionable powerhouse of the SHERPA Z-series. This machine is 114 centimetres wide and has a breakout force of 726 kg. The Z50 will successfully take on any challenge!

COMPACT POWERHOUSE

Small in size, big in approach. The SHERPA 100 is compact, but powerful. In addition, its small size offers a lot of practical benefits. The SHERPA 100 can easily be transported in a mini-van and will have no trouble navigating through small spaces, like doors and elevators. This machine therefore is a prime example of working smart! The SHERPA 100 is produced with a width of 76 or 114 centimetres wide, and available with a petrol or diesel engine.

HONDA GX390
12 HP

SHERPA 100 Agri-Line

In need of an extra pair of hands while working in the stables or on the farm? The 76 centimetre wide SHERPA 100 Agri-Line manoeuvres easily through the stables to provide support where its needed. For example with mucking the stables and supplying straw, hay and animal feed.

HONDA GX390
12 HP

SHERPA 100 Small

Heavy work in tight spaces? The SHERPA 100 Small will carry out all duties for you precisely and efficient. You can use it to move and excavate soil, but also to supply and remove materials. The ideal machine for construction and demolition professionals!

HONDA GX630
21 HP

SHERPA 100 Benzine

The SHERPA 100 Petrol takes on any challenge! With its powerful and reliable HONDA engine this machine carries out all the heavy work for you. From paving roads to dragging stumps, the SHERPA 100 Petrol is happy to help with any task.

KUBOTA D722
20 HP

SHERPA 100 Diesel

The SHERPA 100 Diesel is a compact earthmoving machine and a mobile hydraulic powerhouse. Once the machine is equipped with the right tools, its suitable for all kinds of industries. Construction and demolition, but also the road construction and landscaping industries.

SHERPA 300

ELECTRIC ARTICULATED LOADERS

We attach high value to sustainable innovation. To ease hard work, reduce costs, and lower the increasing pressure of the tightening labour market. From that point of view, we developed two new battery powered articulated loaders: the SHERPA F10 and S10! Both are great power forces, yet have no harmful emission. An asset to any professional willing to work efficiently, safely, and above all sustainably!

27 Kwh
4 x 3 HP

SHERPA S10

The perfect articulated loader for smaller spaces! The S10 is based on the SHERPA 150, but is fully electric and even more powerful. This machine is equipped with a strong yet maintenance-free lithium-ion battery, that has a particularly long lifespan. Therefore the S10 can be used for a full workday! The machine also has hydraulic quick lock and an even higher tractive force than the SHERPA 150. Finally, the S10 is only 76 centimetres wide when fitted with the standard tyres.

30 Kwh
60 HP

SHERPA F10

A real powerhouse, without harmful emission – the F10 has an output of no less than 60hp and is fully electric! This machine is equipped with a powerful lithium-ion battery too and therefore lasts for a full workday. The F10 also has an energy saving steering system, electric parking brake, and hydraulic quick lock. In addition, the two electric driving motors ensure an increased tractive and pushing force. Finally, the SHERPA F10 has a lot more driving ability than similar machines from the same weight category. Without doubt the perfect addition to your team!

FUEL POWERED ARTICULATED LOADERS

Whereas the skid-steer mini-loaders already have set milestones when it comes down to working smart, the articulated loaders take it one step further! More speed, power and lifting capacity, with no less than two external functions. The articulated loaders also have a seating surface for the driver to sit on, ensuring more driving comfort. View our extended range and find your new teammate!

KUBOTA D722
20 HP

SHERPA 150

A minimal working width of only 76 centimetres and therefore the smallest articulated loader on the market! The SHERPA 150 is the ideal machine if you often work in narrow spaces, because you'll have no trouble manoeuvring this small machine through every narrow corner and hallway. The optional wide tyres ensure stability and low ground pressure, which reduces surface ruts. This machine is perfect for all landscapers and a powerful support in the green industry!

KUBOTA D902
25 HP

SHERPA 200

The SHERPA 200 has all the power that is needed to successfully complete any task! In addition, this articulated loader is equipable with a wide range of attachments. Therefore the SHERPA 200 is very popular amongst professionals in road construction and landscapers with large-scale projects.

KUBOTA D902
25 HP

SHERPA 300

A strong Kubota diesel motor and a hydrostatic drive – the SHERPA 300 is an absolute source of power. This machine is able to safely lift and move up to one thousand kilograms of load! It's therefore safe to say the SHERPA 300 is the most powerful machine of our range. A real asset to all professionals working in road construction, paving and the building and demolition industry!

SHERPA ATTACHMENTS

ATTACHMENTS

Every task is different. Therefore we have developed a wide range of tools and attachments, intended for specific duties. Do you want to save time and money, and at the same time prevent frustrations and physical complaints from happening? Equip your machine with tools that fit the work that awaits. From buckets and demolition hammers to pallet forks and roller brooms – with more than one hundred attachments you'll definitely find the right tool for the job. Check www.sherpaminiloaders.com for our full range of attachments.
