The Elmasolvex® RM cleaning machine is a completely automatic cleaning machine for cleaning watch movers and other mechanical precision parts with aqueous solution and solvent based cleaning and rinsing media.

With innovative product characteristics, the Elmasolvex® RM cleaning machine provides a high standard of cleanliness with certified compliance with the EU regulations for machine and explosion safety for cleaning with flammable solvents.

Further advantages

- TÜV-certified Ex-protection
- now with 4 cleaning chambers and one drying chamber (fine filter warm air technology)
- completely automatic or alternatively with individually configurable parameters
- service-friendly and easy-to-care for design
- maximum personnel safety due to connection of the machine to controlled exhaust air routing
- basket frame for five baskets, optional holder for circuit boards
- wide range of practical accessories, see accessories catalogue
- Rotation and oscillation process

Solvent cleaning:

- flashpoint $\geq 23^\circ \text{C}$; e.g. WF pro, 3 x suprol pro, drying

Semi-aqueous combination process:

- e.g. elma 1:9, demineralised water, 2 x elma suprol pro, drying
