HDBP35H BT BACK PACK (FOR HUMDINGER SHAFTS)

The BT BackPack concrete vibrator combines performance and comfort. The ergonomic contouring aluminium frame design and 4-point fully adjustable padded harness evenly distribute weight to both shoulders and hips to improve user comfort whilst reducing back strain and fatigue.

- Heavy duty lightweight frame: fully welded aluminum for extra strength
- Hassle free operation
- Low engine emissions
- Easy access control: Swing control arm for easy RPM adjustment and access to emergency shut off switch
- Isolates vibration transfer to the operator
- Swivel base for improved manoeuvrability and reduced back strain
- Quick screw fitting for easy fitting of flexshaft
- Storage pouch for safely storage of personal items as smart phone
- Fully adjustable 4-pount harness
- Even weight distribution for improve comfort
- Breathable padding
- Heavy Duty Nylon Fabric for strength and easy cleaning
- Advisable flexshafts lenghts in 2m or 3m but longer possible
- Rubber support sleeve for reduced vibration transfer to operator
- Vibrator head available in 25mm, 38mm and 48mm in hardened steel for extended service life
