

## BH4 Bottle jacks, 30T

### PRODUCT DETAILS

- High quality professional welded bottle jacks for intensive use and high demands
- Welded housing ensures higher durability and reduces the risk of oil leakage
- Longer life than normal threaded connections thanks to smooth bearing surfaces and tighter manufacturing tolerances
- Arched steel base keeps the load centred on the piston when lifting the load
- Heat treated extension screw allows height adjustment
- Safety valve prevents the ram from being overextended, which would cause damage to the cylinder
- All models with capacities of 15 tonnes or higher have convenient carrying handles
- Operating conditions: -20°C to 70 °C
- CE certified according to Directive 2006/42/EC and BS EN1494
