

14083 - Finn BlackBlade™ (S) Ash Wood

A handmade solid, full tang knife designed to fit in your pocket or backpack on your next hike. With an ergonomically unique handle made of bright ash wood from European FSC® certified forests and a black knife blade made of recycled Swedish stainless steel, the knife is always ready to perform. Whether it's on foot uphill or by the campfire, Morakniv Finn is always close at hand.

The ergonomic handle made of carefully selected ash wood has a finger guard, and a 2.0 mm thick, black blade made of recycled Swedish stainless steel, which provides both strength and stability in every cut. The black PC-coating creates a balanced contrast between the bright ash wood and the shiny edge of the blade. The vegetable tanned leather sheath protects the sharp edge from surfaces that can make the knife dull. Finn is also compatible with the accessory Morakniv Dangler 10 with Button, which enables you to attach the knife to your belt.
