SHERPA Z10 E200

The E200 resembles its brother a lot – a quality product, designed on comfort and lifespan. But the Z10 E200 is switchable between two gears. A higher speed to cover long distances, and a lower speed to manoeuvre more precisely, save battery and work with extra lifting power. The Z10 E200 is, just like the Z10 E100, ergonomically optimized and very maintenance-friendly.
