2017

BETTER WORKING THROUGH ORGANIZING

KOÇEL®

40 YEARS OF PASSION AND INNOVATION

KOÇEL A.Ş. entered the market in 1977 with the production of mainly formica coated home furniture. By the time, as the demand for formica coated furniture decreased and was replaced by wooden furniture, it expanded its product range to cabinets for the devices in the electrics-electronics sector. The visit to Germany of Mustafa Dolu, who was a teacher at the Merzifon School of Art, was to be influential at the setting of the foundations of KOÇEL A.Ş., which is presently the leader in the sector.

Mr. Mustafa, deemed the price high for the drawer tool cabinet he saw in Germany and shared his drawings and knowledge with Master Mustafa, a steelworker manufacturing in a small building in Istanbul-Zeytinburnu, in order to let the produce in Turkey. But the production seemed not to be possible with the limited machines in the workshop of Master Mahmut. As Mr.

Mustafa didn't resign, brought the rails and bearings he had manufactured in his own workshop, Master Mahmut couldn't remain unconcerned against this resolution and ambition and manufactured Turkey's first 3-drawer steel cabinet by only cutting, bending with a lever shear and a lever press. It went even so far that Mr. Mustafa sold in the subsequent years the plastic drawer separator moulds he had manufactured in order to use in his cabinets to late Master Mustafa who had set over to serial tool cabinet manufacture during the following years, played an important role at the first story of the cabinet manufacture for KOÇEL A.Ş.

Hereby we thankfully remember the late Mr. Mustafa, who was conducive at the achievement of KOÇEL A.Ş.'s present status.

1977
KOÇEL A.Ş. is founded in Istanbul on an area of 200 square meters...

1979
Steel and formica coated home furniture manufacture is initiated...

1992
Continued with drawer cabinet manufacture pursuant to the request of the customers after test samples...

2003
The first plant with an area of 1200 square meters is established in Mahmutbey and the product range expanded with a team of 25 persons...

2010
KOÇEL A.Ş., which continued with its production on an area of 7500 square meters in the Gebze Organized Industry Region, consolidated its position in the sector by not only increasing its product range, but also its customer potential with its advanced technology, its team consisting of the masterly hands in the sector and its belief into customer satisfaction...

2014
It converted the plant in Mahmutbey into a showroom in order to be able to share its expanding product range, new designs and increasing quality with its existing and potential customers...

2016
KOÇEL A.Ş. continues adapting the latest developed technologies to its products, and to improve and expand its product range based on the incoming ideas from its customers and R&D activities...

1985
The first drawer cabinet is manufactured in accordance with the special request and drawing of a customer...

MANAGEMENT
AND CORPORATENESS

Today we are continuing our story we started in 1977 with formica coated home furniture in an area of 200m2, with a production in a covered area of 7500m2 and an open area of 7500 m2 and exports into 25 countries .

My personal involvement into this adventure and the first time I was introduced to metal and sheets started with my employment in the plant during the summer holiday in 1985. In 1991, I started to work full-time in the company and since 2003 I am serving as the company owner at Koçel A.Ş. I can summarize my compassion for my profession I started at young ages with a single sentence: When I would have to come to the world again, I would do this job.

When we turn back and look at our past of 39 years, we gladly and proudly see that he have always left is satisfied customers behind us. This phrase of a famous architect summarizes our sense for quality very well: "I can't sleep relaxed when I would know that the door of the bedroom I am sleeping is attached and non-dyed." Also we similarly attach great importance to that every visible or invisible corner of our products are meticulously and qualitatively manufactured, so as if these were to be exhibited in a museum. At no invisible part of the products are thinner, non-qualitative, undyed materials to be found. Our reliability as a result of our works we always conducted with the motto "if I were the customer" without compromising from quality as of the first day of our foundation was and will continue to be the most valuable investment we made and will make into the future.

In the other side, the more we collect the yield of our meticulous and renunciative works, the more converts contributing a part of our gains to our nation one of our most important priorities, too. We continue with our ventures in order to be able to support in some way projects like domestic automobiles, domestic aircrafts and helicopters among the national projects of our country that will be left as moral heritages to future generations they will be able to be proud of. Again in this context, we have assistance projects towards technical universities and vocational high-schools in order to support our future generations. We try to realize these assistances with sponsorships and product donations to their working environments and workshops.

As a result, while being aware of that Koçel A.Ş. has made an important progress in 39 years, we are never contended and always target to make more by producing the better and to contribute more to Turkey. Our first goal in the upcoming years is to depart Koçel A.Ş. from being a domestic brand and to ensure that it is present in the international arena and to further increase the existing export figures and to convert to one of the top 5 companies in its field in the world.

Metin Koç

Hülya Karadeniz
Factory Manager

I joined the entity of KOÇEL A.Ş. in 2002 as an accounting staff. I have always deemed myself as a part of this family since the first day I joined this cadre. I never experience any difficulty when I am telling our customers about our products since we show the same meticulousness and diligence at the production of our products as if we would use them because "it's always easy to explain quality".

Today, 14 years later, I am very happy and proud to work together with our dear boss Mr. Metin KOÇ, our production and administrative staff, with which we set our signature under many successes at KOÇEL A.Ş. as the Plant Manager with the same enthusiasm and excitement of the first day. As KOÇEL A.Ş., our primary target is to contribute to our national industry with 100% domestic production and to be one of the important world companies and I am continuing to do my part towards this target.

.

Hayati Bektaş
Production Manager

Working at KOÇEL A.Ş. means for me working in family environment. We don't experience any problem since we are working with a mutual relation based on reliance and respect and this definitely reflects positively on our production, too.

My employment responsibility is briefly to produce and deliver the orders accepted by our friends in the sales team within the given time frames with the best, most qualitative, durable materials. That quality is always at the forefront as the company's policy facilitates our job at the production '. That our products are being produced according to this policy contributes a different self-confidence during communication with our customers at the sales and in the field. It's possible to say that our difference with our competitors in terms of production is our curiosity. We always seek for the answers for questions like what can we do more, which innovations might be possible, what could we further add to our products. In some sense, we are continuously competing with ourselves.

Yusuf Yıldız
Export Manager

I examine the new world trends in the field of industry on site and transmit the knowledge I gain to our team and contribute to the design of functional products that our customers will benefit more from. We are intensively working with our team on the determination of the right strategies and implementation of the action plans in order to increase our trade volume in abroad markets and to sustain our contacts without any deceleration. Without contenting with our sales network we established in Asia, Europe, the Middle-East and North African countries, we aim to reach with our products overseas countries and to introduce the quality of Made in Turkey to a broader audience.

Selyattin Şen
Customer Representative

My primary task as a customer representative is to visit the customers and listen to their needs and to generate solutions fitting them and to convert the needs into demands and orders. Also the timely delivery and the after sales follow-up are among the important parts of our duty. Briefly, we observe the process from the generation of the order up to the delivery and the management of the needs possible to incur afterwards.

Ayhan Doğan
Customer Representative

The focus of the production at KOÇEL A.Ş. are always the customer, the customer's needs and satisfaction. And my task starts with being in close relation with our customers and generating solutions regarding their needs related to their field of business. Since we are working here with the awareness that not every product will fit every customer, we have to have a deep knowledge on both our products and the business fields of our customers in order to be able to perform our task duly. We ensure that the needs are fully met by following every stage from creating a product demand until the assembly.

PRODUCTION
R&D

We are conducting our production in our covered area of 7500m2 in the Gebze Industrial Zone with our professional team experienced in their fields and diligently selected. We generate a difference in the sector with our latest technology machine park, our environment sensitive production sense and our happy employees, adopting the values of KOÇEL A.Ş. We know that producing is not enough in order to offer our customers always the best. We compete with ourselves and pursue innovations with R&D activities in order to achieve the better. We also show the necessary diligence in order to ensure that our employees always develop themselves. We focus to produce our ergonomic products, each carefully designed, with the same meticulousness from one piece to thousands of pieces.
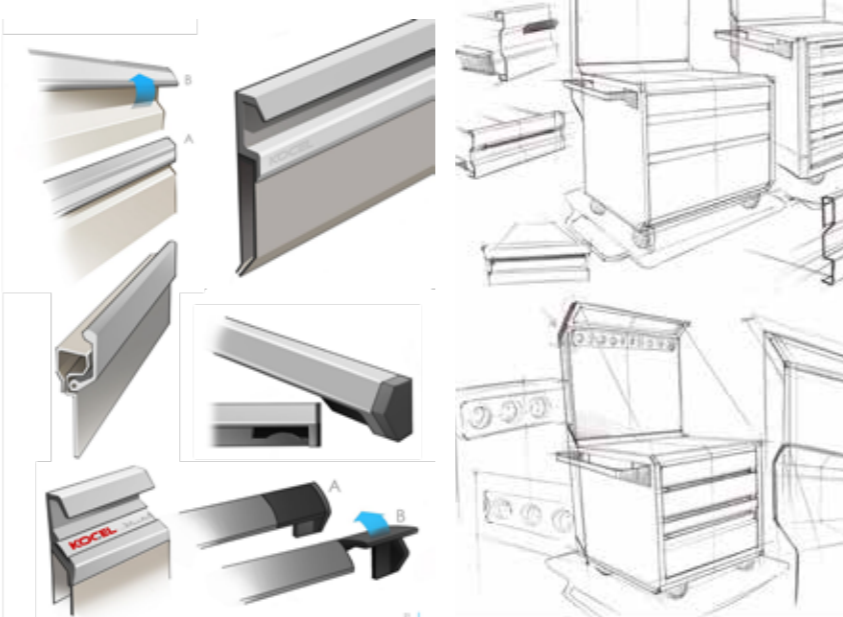

# QUALITY
CONTROL

Each stage of our products, entering our plant as raw material and exiting as final products, is performed controlled, carefully and diligently with latest technology machines and quarter century old masterly hands. For each product we deliver to our customers, we put us in their shoes and always ask the same question: "If I were the customer?"

DRAWER TEST MACHINE

40

YEARS OF PASSION
AND INNOVATION

We always remain faithful to our values since we were established 40 years ago. Our target is to generate added value for our customers and to develop high quality solutions. This approach, which didn't change for years, made us and continues to make us gain loyal customers. We are always ready for long termed successes.
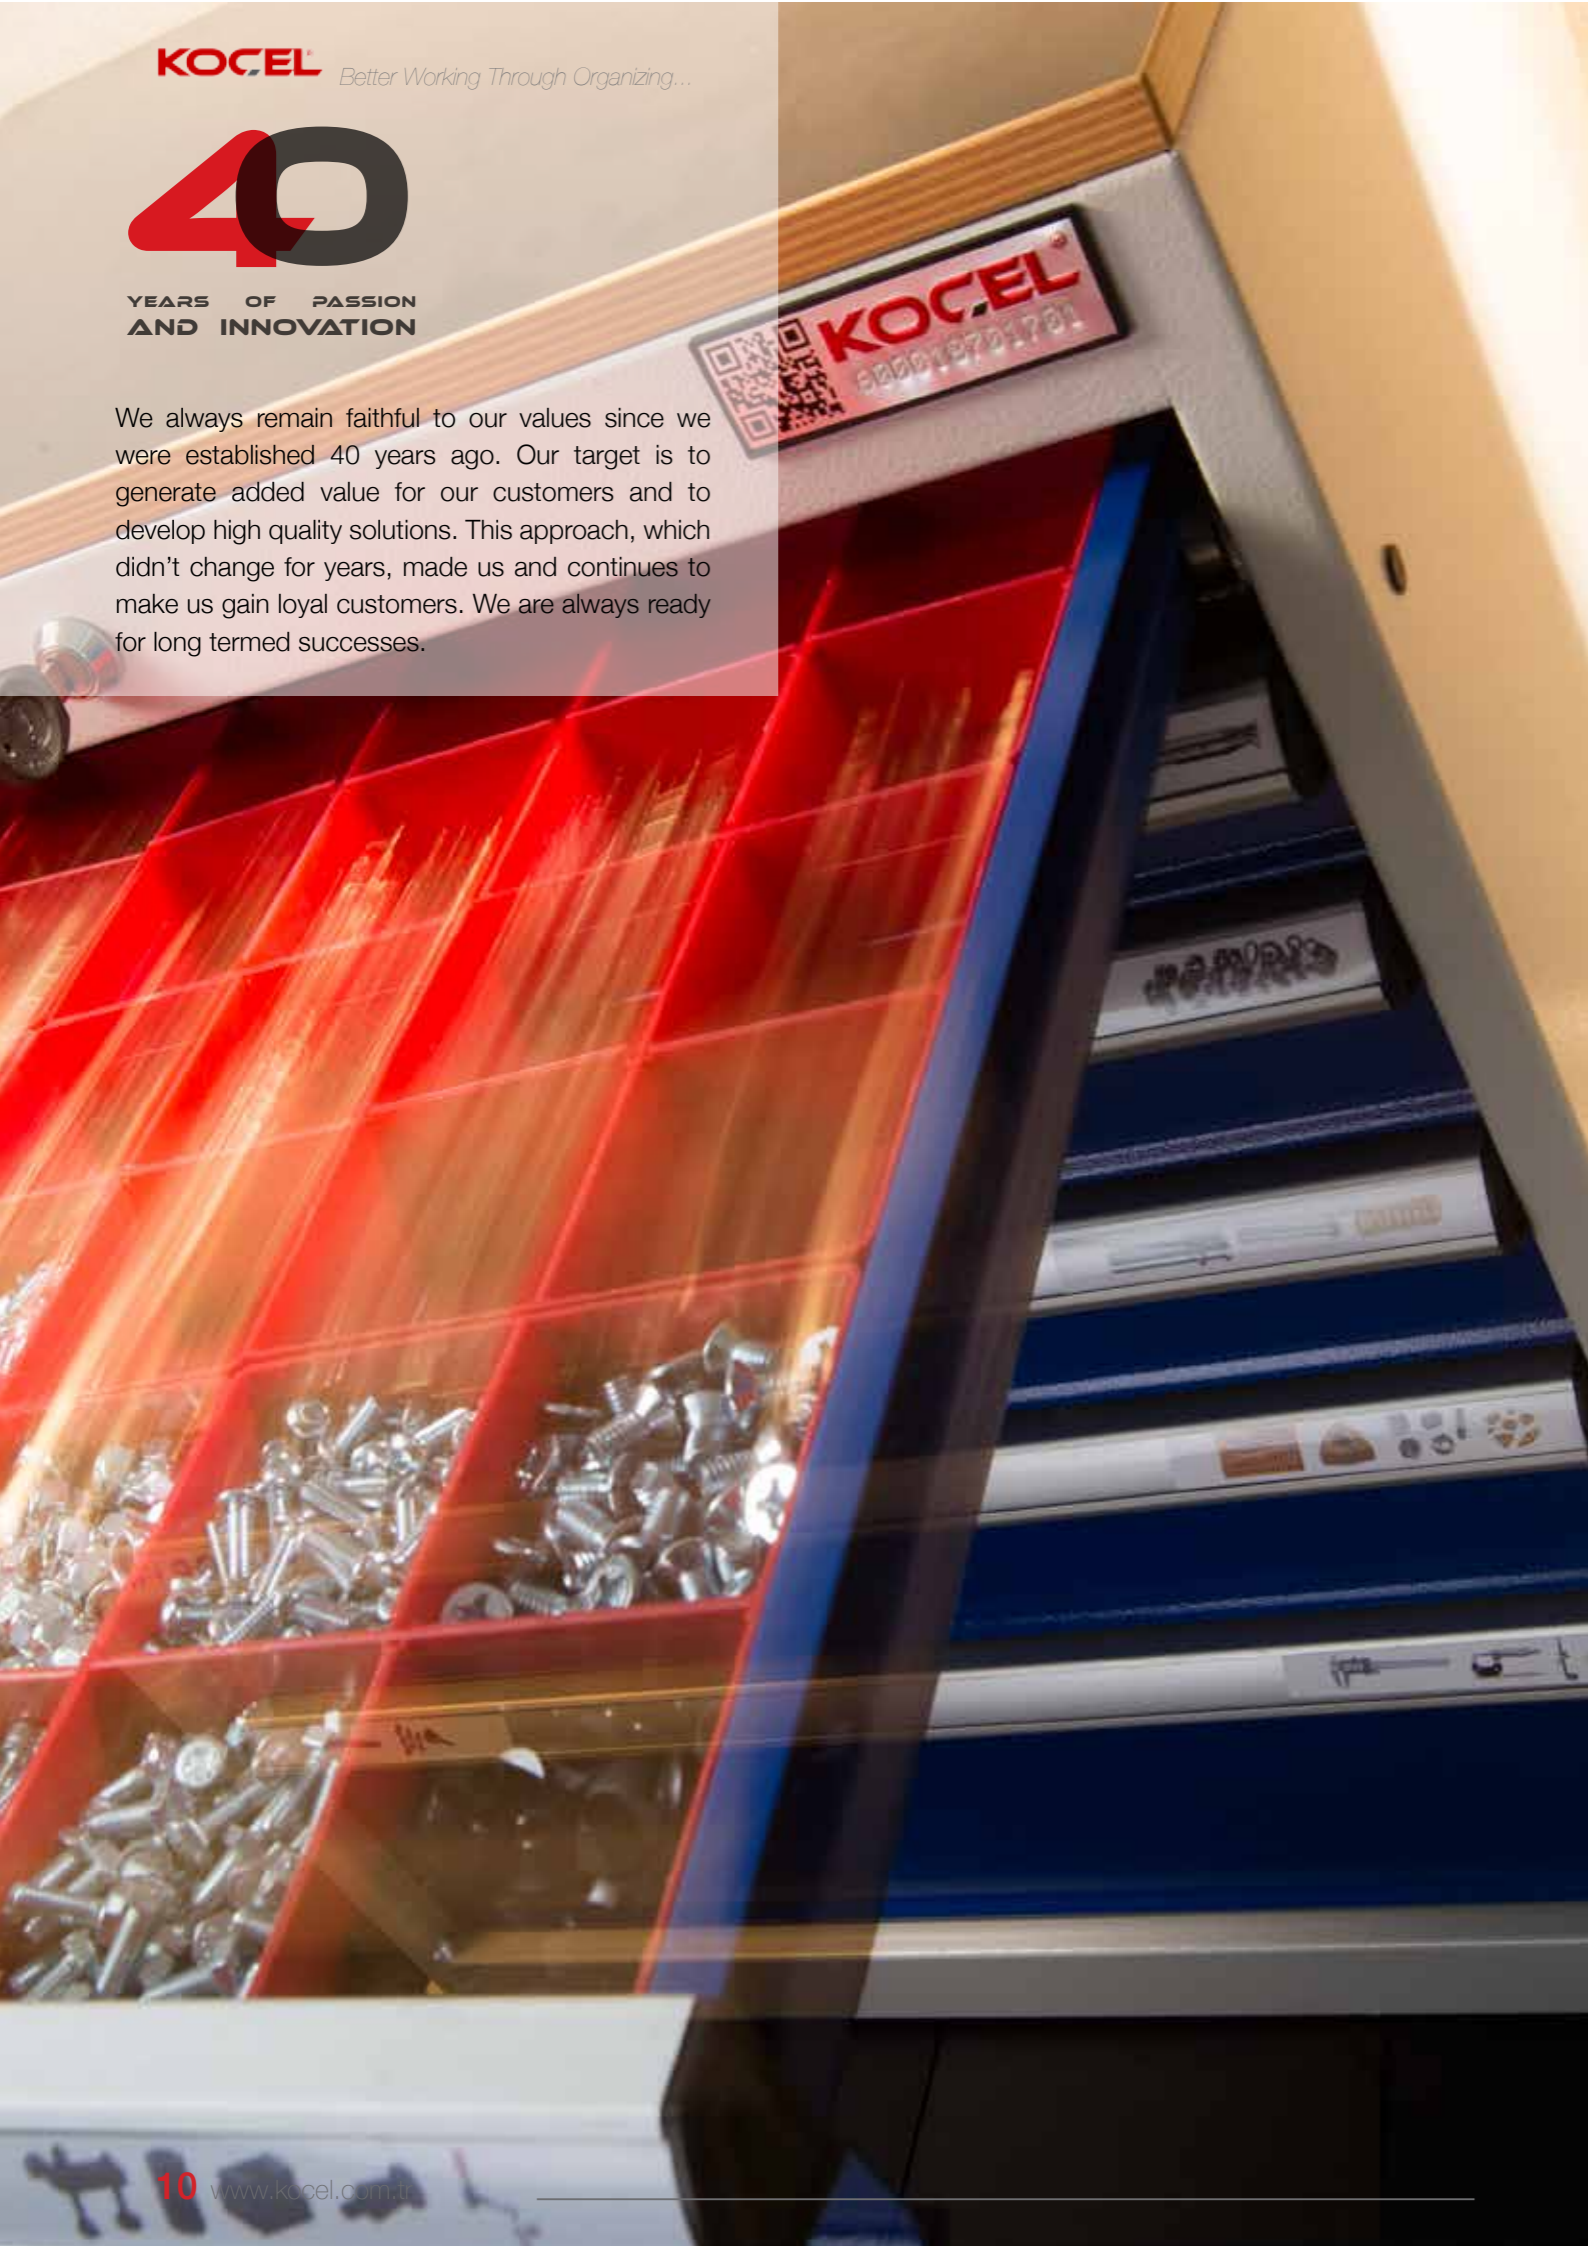

SOLUTION
PROJECT

We know that each of our customers is different from the other and need therefore custom tailored solutions. That's why we visit you on site, listen to your needs, observe your production processes and prepare special projects for you and offer our solutions in order to increase the efficiency by ensuring the organization within the working environment instead of generating standard solutions.
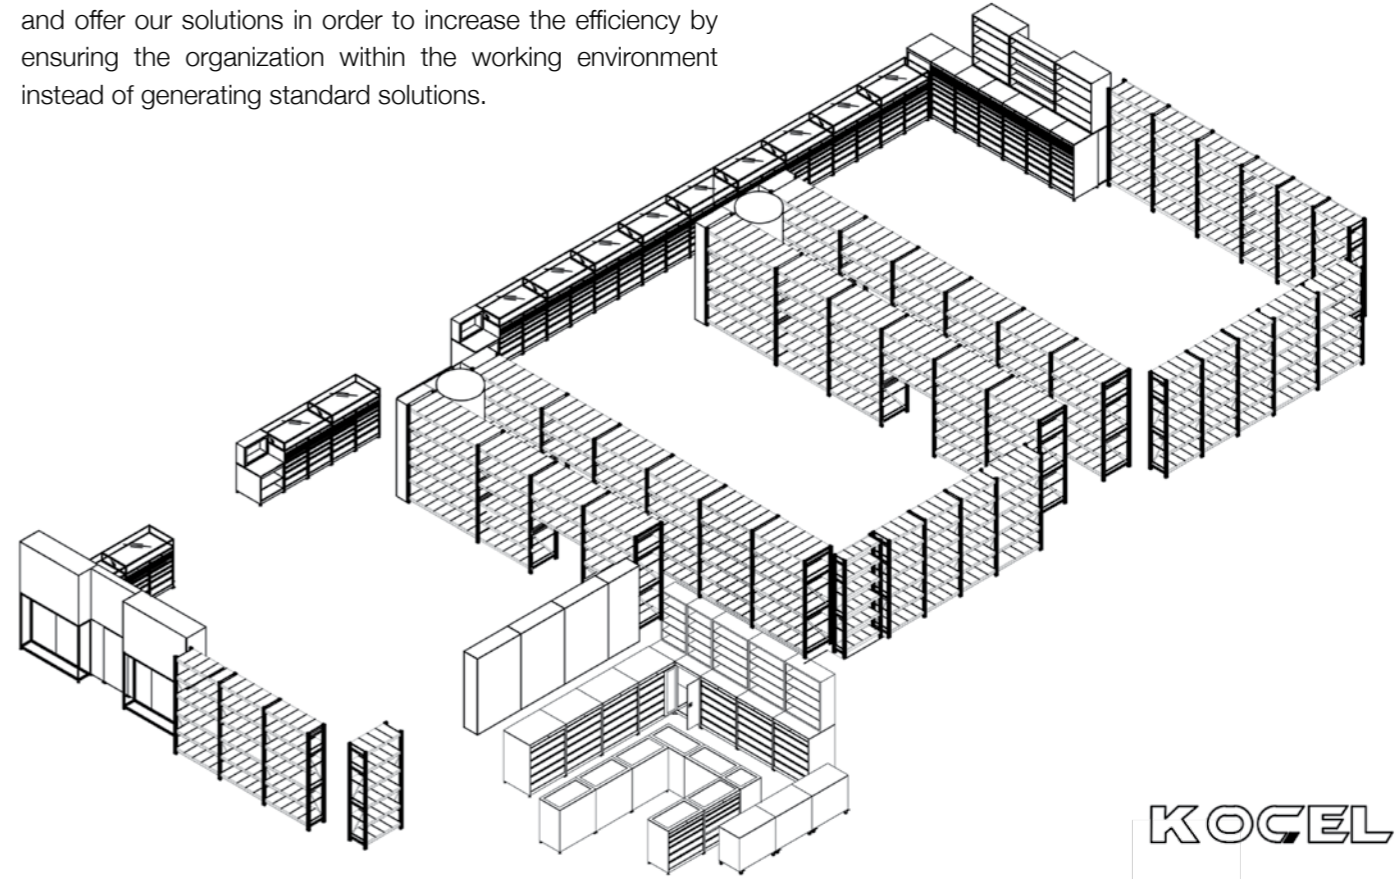

KOCEL

SATISFACTION
SERVICE

We as KOÇEL A.Ş. have built our philosophy since 40 years on customer satisfaction. Our aim was not short termed high sales, but to establish stable and consistent relations. As a result of this approach, we have established and continue to establish long termed partnerships with our customers based on mutual respect and reliance.

DRAFT
DESIGN

YOU IMAGINE IT
WE MAKE IT REAL

You will experience the quality and the difference at the new designed products of our brand.

We always try to look from your perspective while conducting the R&D and design works for our new products. We always care on that our products are more ergonomic, more functional and more aesthetic without compromising from quality at any time during the development of our products and try to realize all these without resulting in any additional cost for you.

The product colours to be seen in the catalogue are the closest ones to the real colours. Our colour options are limited to the stocks of the manufacturing company. Our standard colour codes are RAL 5015 and RAL 7035 and the other colour codes are available for orders of 10 or more pieces. 10% price difference is applied to your other colour requests.

Anti-Tilt

+ While one drawer is drawn the other drawers are blocked when the lock is open.

Plastic Latch

+ The drawer may open while moving on sloped ground having left the lock open. There is a spring-loaded safety fastener on the right.
+ Thus, the drawers will not open uncontrolled on non-even sloped grounds.

Brake

+ There is a brake system at our wheeled products in order to prevent unwanted movements.
+ It is possible to fix the product at the desired position.

Central Locking
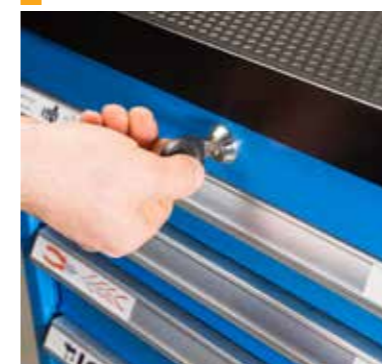

+ All drawers can be locked with a single central lock.

Embedded Lock

+ While a drawer and cabinets with doors can be locked with a single key, also only cabinets with doors can be locked.
+ The lock bed is safe against strikes since it is embedded.
+ The lock bed has also the function of a grip.

Smooth Edges

+ We double fold press the sheets and eliminate sharp edges against possible occupational accidents during taking out, placing in materials into the drawers.

FUNCTIONAL
ERGONOMIC

As KOÇEL A.Ş., we are aware of that one of the most important rules of working with less losses and efficiently during the production are well designed working areas that meet the needs of the employees and particularly support the organization. We prioritize this knowledge during the product design and projection stages and prepare and offer you custom tailored solutions with our ergonomic and broad product range. Whatever your production and business may be and which scale you ever may have, we will definitely present a solution that fits you.

2 YEARS GUARANTEE

The products you purchase from KOÇEL A.Ş. are under the guarantee of our company for a term of 2 years against production defects.We are customers and solution focused on your side at any problem possible to incur.

ENVIRONMENT SENSITIVE

We believe that the whole society should be responsible for being sensitive against the environment. We have established energy saving and smart illumination system in order to minimize the influences of our production on the environment. We deem all that we acquire from the nature as a trust and plant each year 100 trees in order to return these to the nature.

CUSTOMER SATISFACTION

The broad product range, the ability to manufacture flexible that allows a custom tailored production and short delivery times will be sufficient for you to chose KOÇEL A.Ş. at the very beginnig. But we deem to sales process as a cycle, not as a linear process and believe on the importance of the after sales follow-up and continious customer satisfaction in order to be preferred again by our customer and progress in this direction by developing us uninterruptedly.

SPECIAL DESIGN & ASSEMBLY

Since no production and production site is identical with another, we deem presenting solutions in accordance with the production and working areas of our customers as a priority before offering you any product we visit you at your place in order to understand your needs and conduct the projection fitting you as a part of our service. We generate the most suitable solution for your special needs from our standart product range.

QUALITY CONTROL

We meticiously track our products during every stage of the production. Particularly our series with drawers are subjected to an opening-rail test at a special testing device.We deliver each of our products with a product tracking number and a width-depth-height label on packaging. In addition we add the QR code on the label, by which you can access the product user's guide in case of need.

%98 EXTENSION DRAWER

The drawers are the basic material of the main KOÇEL A.Ş. products. there are 9 standard sizes with regards to the inner dimensions of the drawers pursuant to our product diversity goal and aim to meet different needs.Our drawers are equipped with 6X01ZZ bearings and offer usage easiness with %98 extension.

LOCK SYSTEM

There are safety latches under the grips beside a central locking system in order to ensure the safety at our products in order to ensure that you don't compromise from occupational safety at your facility

80KG BEARING CAPACITY

Our drawers have a bearing capacity of 80kg when they are %98 retracted. We ensure a support with a special shape to the bottom of our large sized drawers.

5S + TPM

We offer equipment organization solutions designed for the efficient field applications of effective production facilities.

LEAN

We implement flexible designs that will fully ensure a fuctional basic material flow and allow the accurate and waste-free management of the other production means like equipments, auxiliary materials in the production sites of the lean production system.

ON TIME DELIVERY

We deliver your orders in the shortest time as possible with our own vehicles to close locations and reliable transportation companies to far distances within 24 hours as of the completion of the production.

OCCUPATIONAL SAFETY

Our products are designed in accordance with the occupational safety rules and by taking top level measures against possible occupational accidents. Thus, occupational safety is supported at your company and your working environments.

ADEL KALEM
Recai Açıkgöz
Purchase Manager

We have never faced any problems with KOÇEL A.Ş. during the 6 years we worked together with regards to customer focused solution paths and concordance on the costs. We preferred again KOÇEL A.Ş. products of which the quality have never questioned when we moved to our new plant. The flexibility and the confidence provided by the company were the primary reason for our preference. We benefited from the KOÇEL A.Ş. products with organization and extra occupational safety in the working environment.

YILDIZ TECHNICAL UNIVERSITY
Ass. Prof. Dr. Alptekin Ergenç
Machine Engineering Department Deputy Head

The look of the working environment, the quality and long termed usability of the used products are the most important parameters expected at product preference. The fact that colours are used, that provide positive energy to the persons working in that area instead of ordinary product colours was also important at the preference of these products by us. Different products of KOÇEL A.Ş. are preferred during the refurbishment of our Automotive Laboratory and the YTU Racing garage and a visual and functional consistence that gained the appreciation of all our students and visitors coming to the laboratory is resulted. We think that the paint, material quality and the sense for customer satisfaction were the basic reason for the consistence in the working area in question.

TOYOTETSU TURKEY
Fikret Yavuz
Human Resources and Administrative Affairs
Deputy Manager

The first that comes to our mind when we think of the company KOÇEL A.Ş. is quality. The ordinance and organization is provided in our company thanks to the diversity and special designs of the KOÇEL A.Ş. products. The durability and trouble-free, easy usage of the products were the most important reasons for our preference. We are using the purchased products long years without problems since they are qualitative and stable.

D R A W E R
CABINETS

+ These are tool cabinets with drawers.

+ The drawer heights of the cabinets are between 75 mm-200 mm and can be arranged at steps of 25mm.

+ There are to the ground adjustable M12 ball joint feet at the bottom of the cabinets.

+ There is 18 mm melamine coated chipboard at the upper surfaces, which provide a neat look and a facilitated working possibility.

+ There are 3 mm rubber sheets on the bottom of the drawers and plastic separators with 3 or 4 channels or 3x3 metal separators can be applied on demand.

MAXIMAL
UTILIZATION
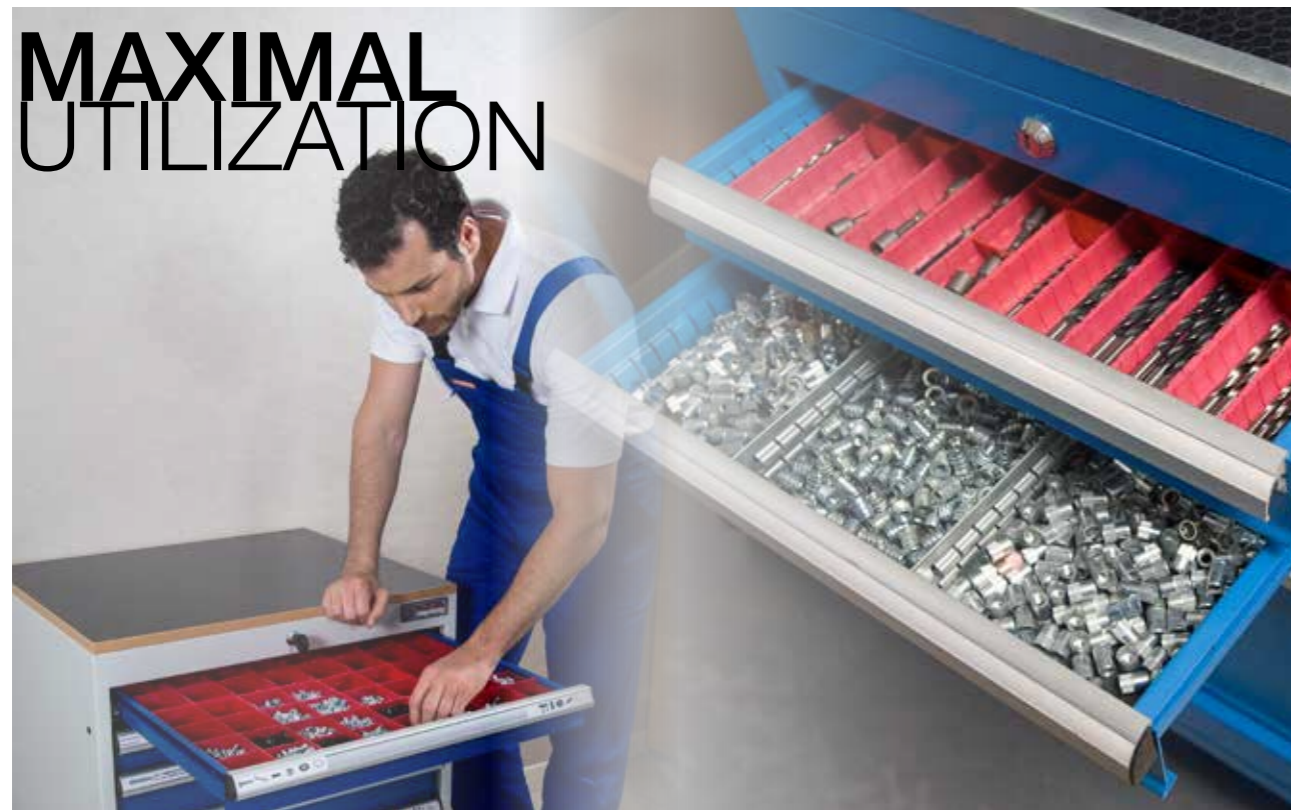

Separation Solutions

+ You can convert the inner of the drawers most suitable for your usage purposes by utilizing one or more of the CNC holder, plastic box, channeled plastic separator or metal separator options.

Plastic Separators

+ Our plastic separators are 3 or 4 channelled and prevent the ordering of any type of cutting and wearing tips and that they contact and magnetize.
+ Barcoding and labelling is possible by the labels on the front side.
+ They provide the possibility to store materials with a length between 10mm-900mm.
+ Materials of different sizes can be placed in by arranging the separators in the width and length.

Metal Separators

+ The metal separators can be adjusted from the front to back in steps of 17mm to the desired distance thanks to the E standards complying channels at the sides of the drawers and from left to right in distances of 150mm and 200 mm.

CNC Holder Drawers

+ There are applications for CNC holders at the drawers of the sizes 450x450mm, 600x600mm, 450x900mm.
+ Drawers with special CNC holders from 300mm to 600mm can be applied.

Voluminous Materials

+ There are mobile shelves for voluminous materials not fitting into drawers.
+ It is safe and appropriate to use the mobile shelves in cabinets with doors.

Organized Drawers

+ The interior of drawers consist of 150mmx150mm and its folds (300x 450mm, 600x600mm, 450x600mm etc).
+ Our plastic boxes of the size 150x150mm can be divided into 2 or 3 or 4. (Sizes of 150x150mm, 150x75mm, 75x75mm can be obtained.)

Professional Labelling

+ Allows you to find the matrials in the drawer easily.
+ You can create the labels according to your needs with the label printing software.
+ The wearing of the labels are avoided by the transparent coating on it.
+ The labels are easily inserted and removed by removing the plastic taps at the aluminium grip heads of the drawers.

Maximal Utilization

+ Maximal utilization space and access to the materials at the very back is provided by the 98% extension of the drawers.
+ The drawers have a bearing capacity of 80kg at an extension of 98%.

Easy Archiving

+ Assisting drawers at the archiving of your hanging files.
+ There are telescopic and normal railed options available.

Different Design in Common Spaces

+ A single drawer may be converted suitable for different usages by dividing it with plastic boxes, metal separators or plastic separators.

With Empowered Bottom Surface
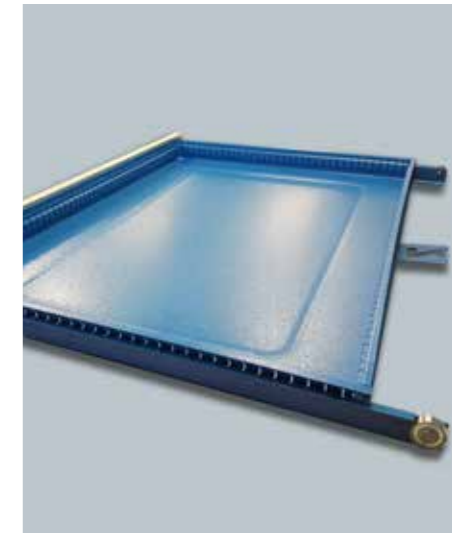

+ At drawers with a broad bottom is stability provided with a special form placed at the lower bottom in order to avoid bending downward.

CNC TOOL
CABINETS
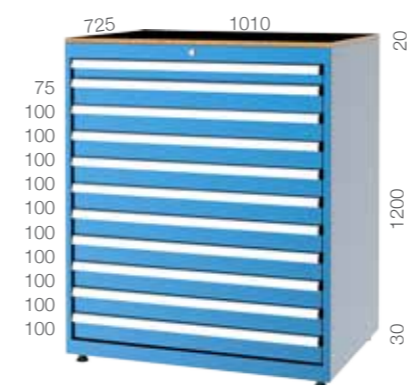

+ We have models able to be used fixed or mobile, depending on the request.

+ These are high quality cabinets, appropriate for the storage of small materials and provide an easy access.

+ They can be used for SK 30-40-50 morse tapers and for HSK 16-32-40-50-63-80 tapers.

+ We have a special fixed CNC plastic for HSK 100 upon request..

+ We have a special CNC plastic suitable for CAPTO C3-C4-C5-C6-C8.

+ These are welded, stable, steel sheet construction and coated with electrostatic powder paint.

+ There are 4 vertical rail guide studs inside the cabinet.

+ The silent operating drawers have a load bearing capacity of 80 kg and a single drawing of 98% and equipped with a high safety, two key central locking system.

+ There are prefabricated, punched channels in all drawers and whilst the drawer height can be varied at steps of 25 mm, it is possible to create diverse drawer combinations with metal separators according to all drawer heights.

+ The rails are X.5 mm 6X01 zz bearing and the E standard is 1E=17mm.

+ They include to the ground adjustable M1X screwed chocks.

+ The doors at the models with doors can be opened by 180°.

+ There are round edged, embedded stripe channel, eloxal aluminium lugs and plastic taps on the lug heads.

The number and variety of the CNC holders being used at central CNC processing benches is progressively increasing. And as KOÇEL A.Ş., we are tracking these developments.

One face of our plastic holders is suitable for the angles and degrees of SK holder and one face for angles and degrees of HSK holders. We also have holders for tapers of the Capto series used at new generation high speed machines.

.

INDUSTRIAL
CABINETS

+ These are welded, have a stable 1.20 mm steel sheet construction and are electrostatic powder coated.

+ There are 4x rail guide studs inside the cabinets.

+ The silent operating drawers have a load bearing capacity of 80 kg with a single drawing of 98% and there are prefabricated, punched channels in all drawers.

+ It is possible to generate many drawer combinations with drawer heights able to be changed at steps of 25 mm and metal separator suitable for all heights. The E standard of the drawers is 1E=17 mm.

+ The rails are 2.5 mm 6201 zz ball bearing.

+ The doors can be opened by 180° and have an embedded grip, cylindrical safety lock and 2 keys.

+ There are round edged, embedded stripe channel, eloxal aluminium handles and plastic taps on both sides of handles.

+ The shelves have a load bearing capacity of 80 kg and can be adjusted in steps of 25 mm.

+ There M12 screwed ground adjustable chocks installed underneath of cabinets.

COMPUTER OPERATOR CABINETS

Our computer cabinets are suitable for multi-purpose uses with their available alternative sizes. It generates organizing solutions in working environments with standard or special PC monitors and towers at different sizes.

The front sides of our cabinets, except our products with the codes 7441-7442, are able to be locked with a single key. There are ventilation holes at the backside of the PC cabinets and beside this a 4x power infeed cable inside the cabinet. The monitor section consists of backward sliding, 3mm transparent plexiglass in a metal frame.

code 7441

- ✓ Monitor casing with unbreakable plexiglas window
- ✓ Suitable for monitors up to 17"
- ✓ Lower casing lockable semi-cover
- ✓ 4 x socket group with switch
- ✓ Keyboard drawer
- ✓ Ventilation holes for air circulation at the back cover
- ✓ Fan assembly location
- ✓ To the ground adjustable ball joint feet

These are designed as a drawer or shelf group with 3 separate sections, suitable for different usage purposes in the same cabin. The advantage of this model is that it can be used for different usage purposes by the varying sizes of the drawers. The shelf heights of the cabinets can be adjusted according to the demand. Beside this, there are M12 to the ground adjustable ball joint feet and latches are used at the doors.

CHEMICAL
STORAGE
CABINETS

ENVIRONMENT FRIENDLY PRODUCTS
KOCEL
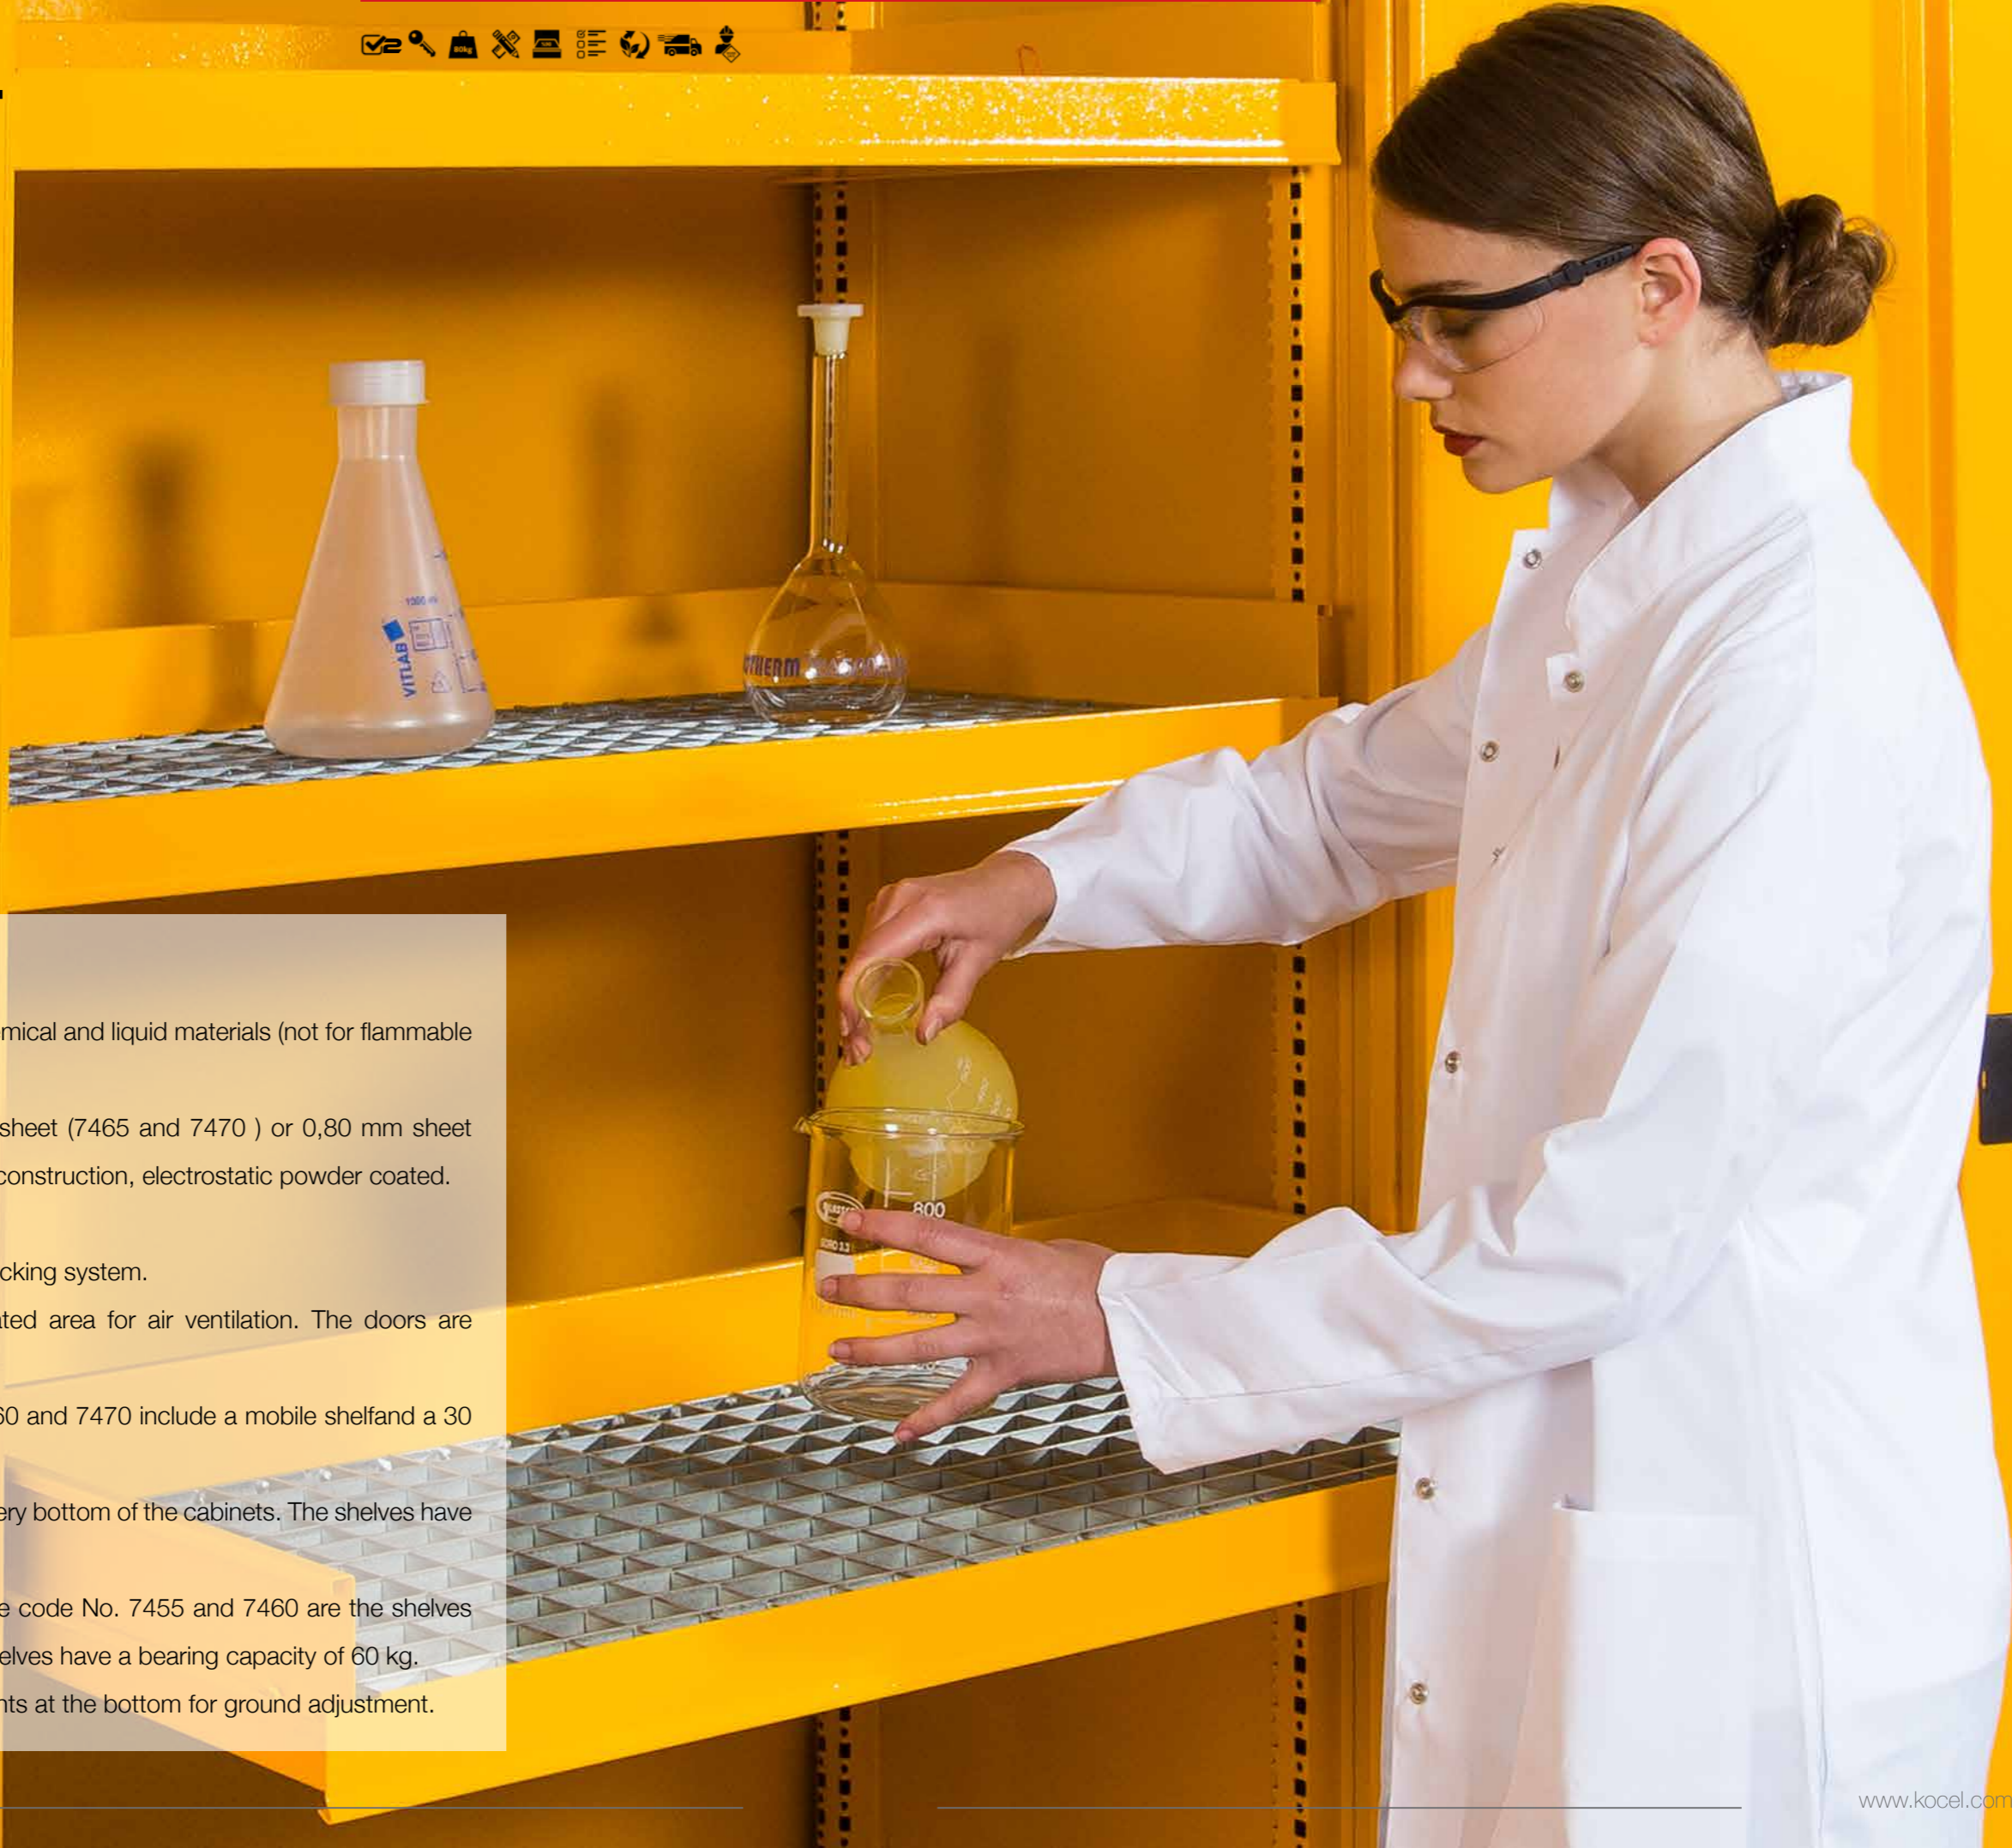

+ These are wing-door cabinets.

+ They are used for the storage of chemical and liquid materials (not for flammable or explosive materials).

+ The housing is made of 1,20 mm sheet (7465 and 7470) or 0,80 mm sheet (7455 and 7460). Welded, stable steel construction, electrostatic powder coated.

+ Height adjustable shelves.

+ 3 point locked, secure, qualitative locking system.

+ The cabinet doors have a perforated area for air ventilation. The doors are openable by 180 degrees.

+ The cabinets with the code No. 7460 and 7470 include a mobile shelfand a 30 mm steel grid at the bottom.

+ There is an oil collection tray at the very bottom of the cabinets. The shelves have a bearing capacity of 80 kg.

+ The shelves at the cabinets with the code No. 7455 and 7460 are the shelves bent up like a pool and are tight, the shelves have a bearing capacity of 60 kg.

+ All cabinets have M12 screw ball joints at the bottom for ground adjustment.

ENVIRONMENT FRIENDLY PRODUCTS

KOCEL

At present, new chemicals enter into our working environment every day due to factors like production easiness and speed.

And we designed with regards to this, setting off from the idea to provide a benefit for our users, special chemical storage cabinets in order to store and keep safe the chemicals used at the work places.

Our chemical storage cabinets are rather designed in order to prevent an overflow, a spillage of chemical liquids than storing flammable and explosive materials. Our priority was to prevent a harm to the environment due to the chemicals used at the work place and particularly their mixing with fresh water. Therefore, we have bent the shelves of our cabinets upwards in a pool shape. We have added an oil collection tray at the very bottom at our models with drawers. At the cart models, we have welded a pool and a discharge tap at the bottom.

FIRE EQUIPMENT CABINETS

450 1200

2000
code **7490**
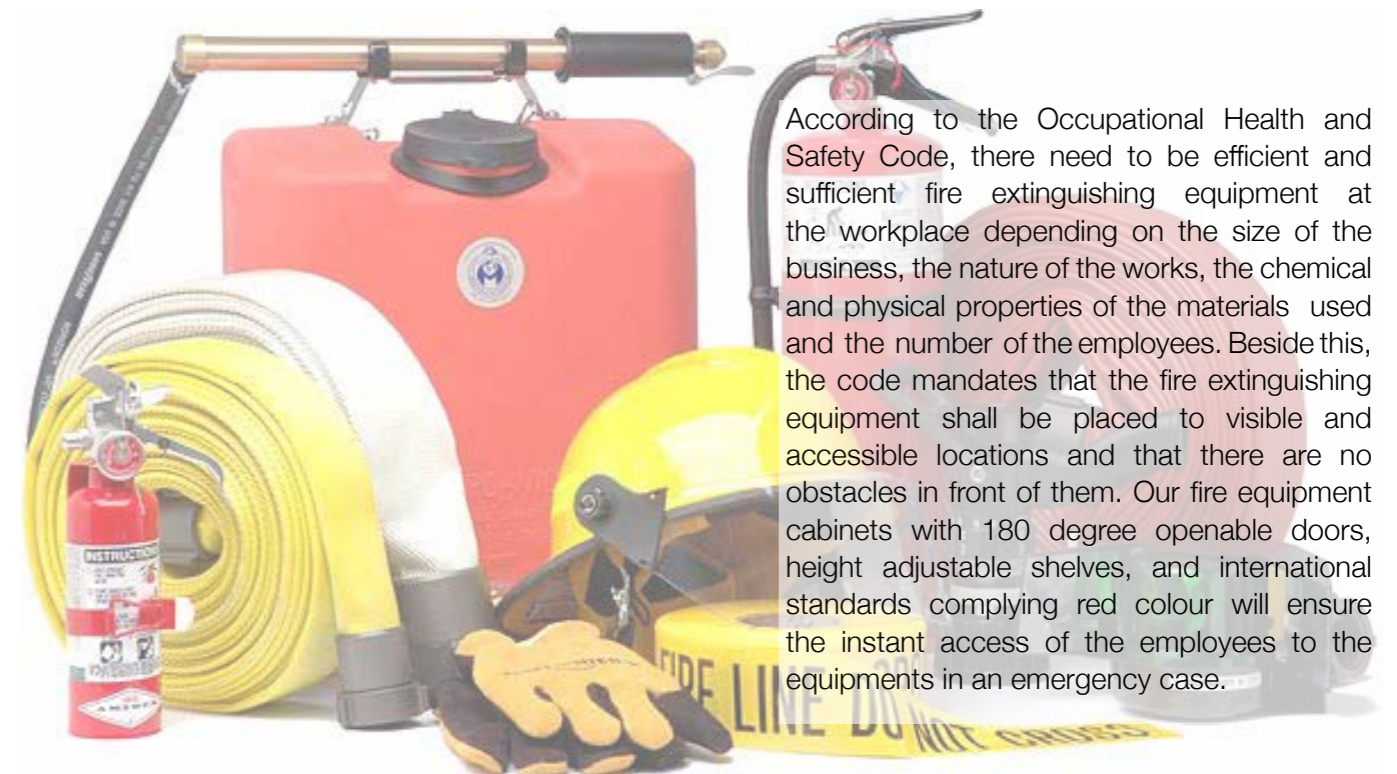

According to the Occupational Health and Safety Code, there need to be efficient and sufficient fire extinguishing equipment at the workplace depending on the size of the business, the nature of the works, the chemical and physical properties of the materials used and the number of the employees. Beside this, the code mandates that the fire extinguishing equipment shall be placed to visible and accessible locations and that there are no obstacles in front of them. Our fire equipment cabinets with 180 degree openable doors, height adjustable shelves, and international standards complying red colour will ensure the instant access of the employees to the equipments in an emergency case.

MATERIAL
CABINETS

+ These are wing-door material cabinets.

+ These are welded, have a stable 0.80 mm steel sheet construction and are electrostatic powder coated.

+ There are 4 rail guide studs inside the cabinets.

+ There are according to the ground adjustable M12 screwed chocks.

+ The doors can be opened by 180° and can also be ordered in plexiglas.

+ The shelves have a load bearing capacity of 80 kg and can be adjusted in steps of 50 mm and may be divided with separators if required.

+ These can be ordered with peg board, drawer module or LINBINs inside.

+ They have an embedded grip and cylindrical safety lock, 2 keys.

HANGER
FILE
CABINETS

At the design of the file and folder cabinets, our aim was to ensure that you can store your files, official or important documents easily and orderly and thus not experience any document loss problems.

We have produced card index cabinets for your hanging files, file cabinets with doors for your folders, cabinets with sliding doors for our customers with limited space, without door distance, compact railed archive cabinets for our customers working intensively with documents and are not able to perform a separate archiving.

In addition, these types are shaped according to the needs: card index cabinets with 2 to 5 drawers, file cabinets up to 1200mm and 2000mm, and compact systems according to your space and the amount of your files are only some of these.

✓ File cabinets with hangers can be used for archiving documents, provide a fast and rapid access to them.

✓ These are welded, 0.70 sheet constructions and electrostatic powder coated.

✓ They have single row drawers for DIN A4.

✓ They are pressure operated, central locked and have 2 keys.

Even if the models may vary, the usage purpose of PPE lockers in offices, at the production, in refectories or gyms is the same. While those in the production prefer full height cabinets or semi-door cabinets, small square cabinets are preferred for personal equipment or protective materials. We have produced narrow cabinets for limited spaces, aesthetic advantage providing Z type cabinets, cabinets with sloping tops in order to prevent in a bad look resulting storage of unneccesary equipments on the cabinets, 2 partitioned cabinets with a single door for a separate storage of dirty and clean goods, and cabinets with sitting banks where the personnel can change their clothes by sitting. Our aim is to prevent a chaotic and bad look at your business place and create clean and tidy personnel areas. You can prefer all our cabinets with key lock, padlock or pin lock. It is possible to add a mirror holder, towel holder or soap holder upon demand.

PPE
LOCKERS

+ These are lockable PPE lockers for production lines and offices.

+ They have a welded, stable 0.70 mm steel sheet construction.

+ Electrostatic powder coated.

+ Equipped with hidden hinges.

+ There are cloth hangers available.

+ The doors are 120 degree openable.

+ They have rotating sliding double safety locks for padlocks.

+ There are 2 shelves at the models with full height doors.

+ Lock can be added upon demand.

+ There is a plastic for the cloth hangers and a plastic bottom against rust and scratches at the shoes.

+ All cabinets have a label slot for names.

Linbins are boxes in different sizes and colour made of polypropylene material and can also be named as storage boxes with open front.

Even if the usage purpose of the boxes may vary, these are generally used in order to store assembly materials like screws, nuts and washers.

Taking into consideration that we have customers from very different sectors, we have designed linbins able to suit every business and every sector. Beside fixed, unidirectional boxes in different sizes and colours, we have also produced bidirectional, wheeled models and have applied hanger panels to the same model.

We wanted that inclined shelves should be able to be used at the same models for assembly materials that would not fit into boxes. Thinking of that pieces could be stored in these boxes, that shouldn't be lost, we have adapted the linbins into cabinets with lockable doors.
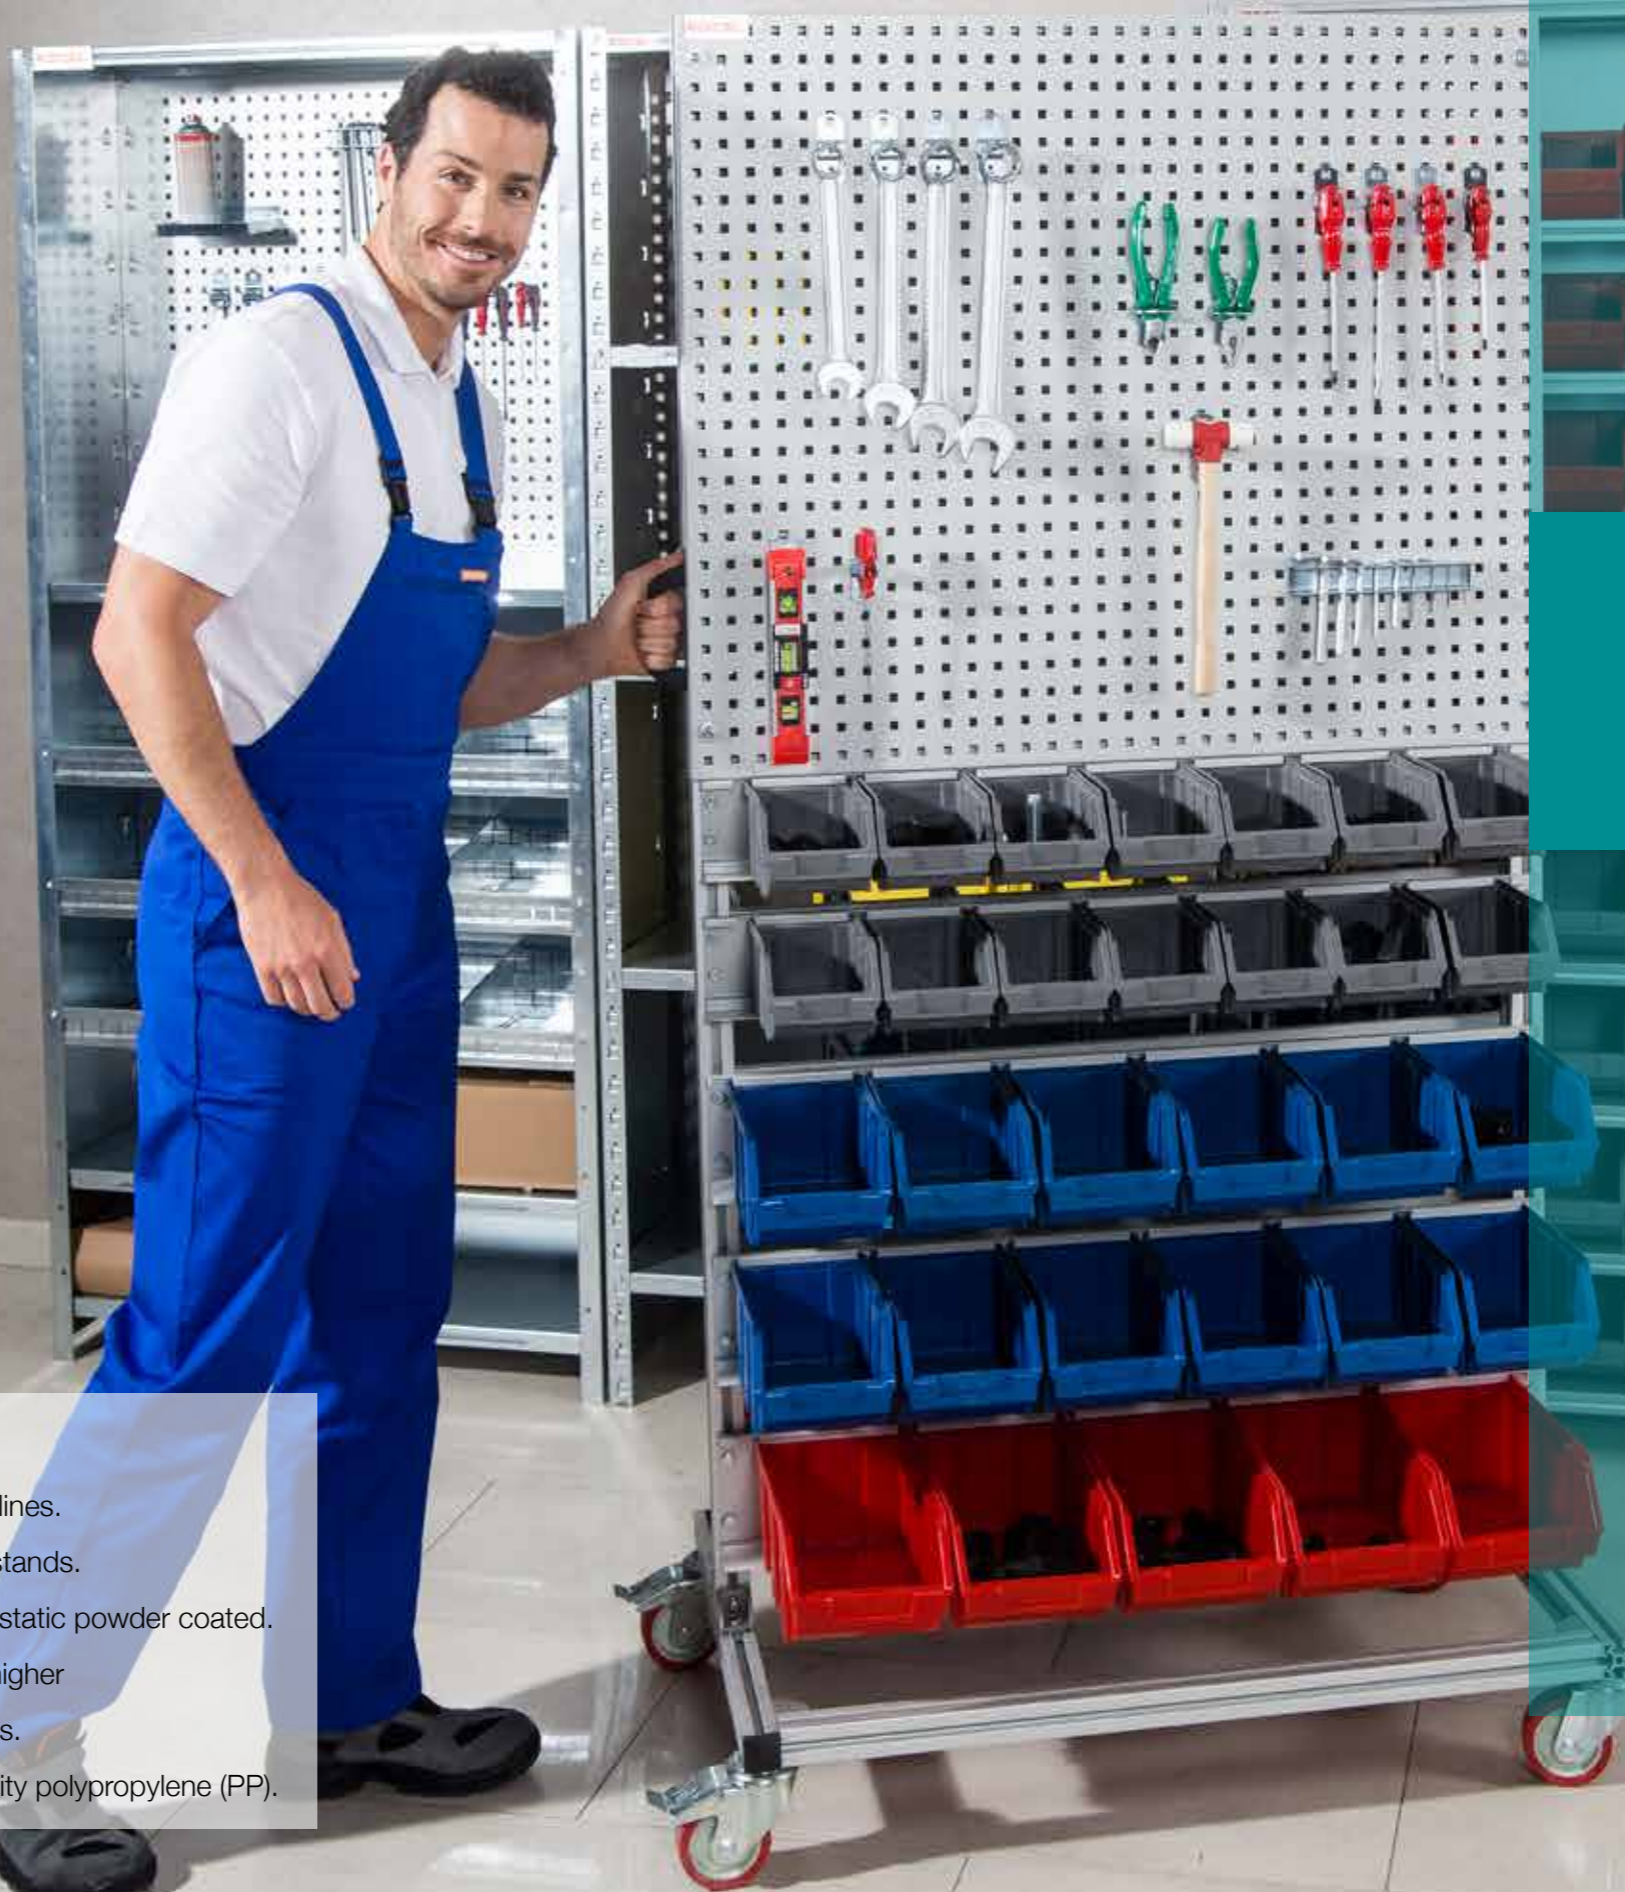

LINBIN
SYSTEMS

+ Used to keep mounting materials ready at production lines.

+ The mobile and fixed racks are screw and spare part stands.

+ The 40x40x2 mm box is profile framework and electrostatic powder coated.

+ The bins can be ordered both sided and used with a higher

capacity, whereby the bin sizes are indicated in the images.

+ The plastic bins of our products are made of high quality polypropylene (PP).

W O R K
BENCHES

+ These are suitable to be used in any type of working areas for assembling, servicing, maintenance, production, R&D.

+ Electrostatic powder coated.

+ The drawer combinations under the benches can be manufactured according to demand.

+ A pegboard, power bar, fluorescent lamp, clamp

can be added to the benches.

+ The tops of the benches are made of pinotex coated 25 mm MDF plates and the table top

can be furnished with rubber sheet, galvanized sheet, stainless steel sheet according to demand.

+ The rubber sheets are fixed with galvanized L shaped brackets to the MDF.

+ The feet are welded and the intermediate coupling is

made with bolts. There are rubber shoes at the feet, holding from the sides, in order to prevent

scratches of the ground.

MOBILE
WORK BENCHES

✚ Suitable for production, maintenance, servicing areas.

✚ The 30x30x1.5 mm box is profile framework and electrostatic powder coated.

✚ On demand can peg boards, electricity panels, fluorescent lamps, vices, plastic bins be added to the benches.

✚ It is possible to mount different cabinet alternatives under the carts.

✚ The table tops are produced of pinotex painted 25 mm MDF plates and the plate tops can be rubber plate, galvanized sheet, stainless sheet according to the need.

✚ The rubber sheets are fixed with galvanized L shaped brackets to the MDF.

✚ The wheel set consist of 2 fixed, 1 swivel and 1 swivel+brake 125mm wheels.

T O O L
CARTS

The most important advantage of our products in the tool cart range is that they provide an ergonomic and practical usage thanks to their small dimensions.

Tool losses are kept at least level with the storage of the tools in the drawers. Our products are generally preferred in the automotive service sector and in the maintenance and repair departments of plants. This group includes alternative models with drawers, shelves and many other features.

Our tool carts of the series 8100, generally preferred by the aviation sector, are offered for your usage as models with 5, 6 and 7 drawers. These have technically the same features as the other tool carts.

SYSTEMS

The need for shelves is generally the result of the requirement to stowe and pile. It is desired in working environments that the materials are easy accessible in sight. Different models and solutions resulted pursuant to the need to use time and the space more efficiently, and to access the products rapidly and easily.

GALVANIZED SHELF
SYSTEMS

The galvanized shelf systems are completely installed dismantled joint and screw fixing procedured. These systems, which meet any type of needs, are generally used in sectors like archives, automotive spare parts, hotels, food industry, hospitals, textile and automotives. The trays are double bent and don't sag down thanks to the pressed sides. There are many types like with separator partitioning, pegboards, drawers, back and sides closed ones.

Our galvanized shelves take the shape according to your need, as a work station in your garage, storage shelf at your workplace, spare part shelf in your store, archiving shelf in your archive.

KOÇEL A.Ş. galvanized shelf systems are environment sensitive. They don't need any welding, dyeing or assembly team.

MINIRACK SHELF
SYSTEMS

This system among the galvanized shelves, commonly preferred for light loads, include traverse types in 3 different lengths (1000, 1250, 1500 mm). The foot lengths can be produced from 1000 mm to 4000 mm. All-round double bent galvanized sheet trays with a width of 250 mm are used.

The traverse heights can be adjusted to the desired size in steps of 25 mm by inserting 3 hooks.

These systems, which meet any type of needs, are generally used in sectors like archives, automotive spare parts, hotels, food industry, hospitals, textile and automotives.

KOÇEL A.Ş. galvanized minirack shelf systems are environment sensitive. They don't need any welding, dyeing or assembly team.

HEAVY TYPE SHELF
SYSTEMS

K-TYPE FOOT PROTECTION

Recommended in order to prevent impacts by forklifts and similar handling vehicles to the shelf feet at the heads of back-to-back connected units.

L-TYPE FOOT PROTECTION

Recommended in order to prevent impacts by forklifts and similar handling vehicles to the shelf feet at the heads of next-to-next ordered units..

U-TYPE FOOT PROTECTION

Recommended in order to prevent impacts by forklifts and similar handling vehicles to the shelf feet at the unit centres.
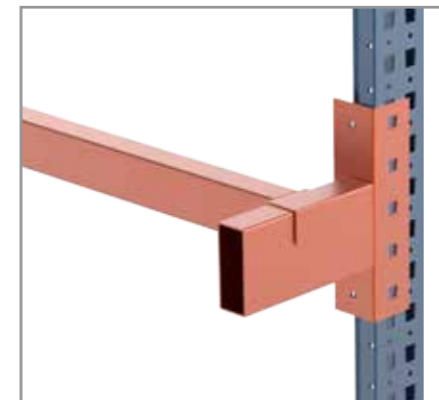

UNDER-PALLET ATTACHMENT

These are support apparatus placed under pallets in order to prevent tilting from front to back.
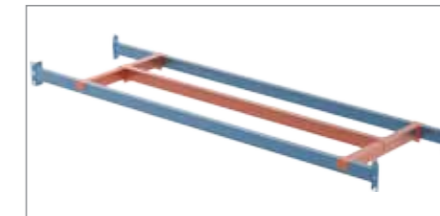

UNDER-PALLET H-TYPE ATTACHMENT

These are support apparatus placed under the whole pallets in order to prevent a sagging and collapse of the pallets placed on the traverse from front to back.
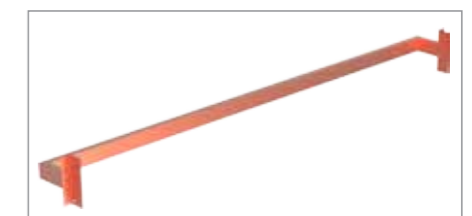

PALLET LEANING TRAVERSE

These are pallet leaning apparatus which prevent that the pallets placed on traverses with forklifts fall back, slip down and ensure that the pallets sit aligned on the transverses.

BACK-TO-BACK CONNECTION APPARATUS

These are apparatus connecting the shelf feet in order to increase the stability of the shelf units against earthquakes and shakes .
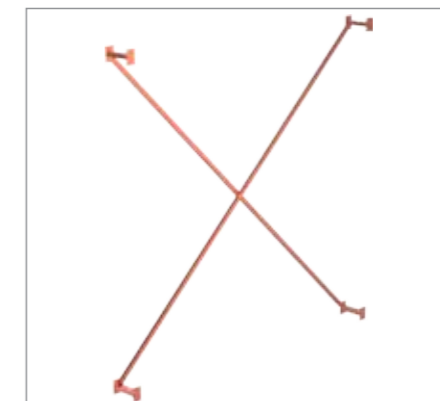

EARTHQUAKE TENSION APPARATUS

These are cross apparatus used for that the next-to-next standing shelf units support each other during an earthquake and shake.

FOOT-GROUND CONNECTION APPARATUS

These are apparatus used in order to fix the shelf units to the ground with steel or chemical dowels against tilting and shakes.

ALUMINUM
PRODUCTS

Aluminum sigma profiles progressively replace steel construction in the industry and are extremely functional, easy to assemble and allow the manufacture of very different products.

The most important advantages of these profiles are functionality, design, their modular structure, the possibility to create the desired product without the need for welding and dyeing.

At KOÇEL A.Ş., we have combined our metal shaping experience of 40 years with the functionality of sigma profiles and created brand new products. We have designed from workbenches to CNC carts, from cleaning stands to computer cabins, from linbin stands to handling carts together.

You may receive the aluminum sigma profiles complete assembled or dissembled and assemble these yourself with only an allen wrench.

Our works in order to increase our product variety in this segment are continuing.

ACCESSORY
LABELLING

No matter whether your working environment is a small workshop or a large plant, one of the most important factors for increasing the efficiency and consequently the profitability is that the environment is organized and tidy. We always work by taking this into consideration while creating a product range and during R&D works. We create the ideal working environment for your production thanks to our products and the custom tailored projects we realize for you. There are some small, but very important details to convert this environment perfect:
Accessories.
You can improve your existing working environment and arrange it according to your new needs with accessories.

Better Working Through Organizing... KOCEL

KOCEL *Better Working Through Organizing...*

LAMINATED CHIPBOARD WORKTOPS

code **TS1765**

Laminated chipboard worktops are wood based worktops that are preferred at the manufacture of modular furniture of any type. These are manufactured by pressing decoration papers impregnated with melaminous resins produced with special recipes at high pressure presses. These are scratch, impact, abrasion resistant, colour-fast, easy to clean and aesthetic looking products.

PLYWOOD WORKTOPS

code **TK1770**   code **TK1760**   code **TK2260**

This is a plywood material made of scaleboard. During the production of plywood are wooden layers glued and pressed at high pressure presses and the surfaces are coated with a water tight film. Plywood is frequently preferred due to, though being light, that it has an extreme stable structure that can resist long terms against any type of condition.

MDF WORKTOP

code **MDF1770** code **MDF1760** code **MDF2260** code **MDF1257**

MDF worktops are plates with a homogenous structure created by pressing the fibres obtained from wood or other cellulosic raw materials under heat and pressure after having these dried until a definite humidity level and glued. MDF is preferred due to its homogenous density at every point due to its structure, is able to be obtained in standard dimensions, its perfect behaviour at milling works, that it holds the screws applied to the surface and the edges well.

STAINLESS STEEL COVER

code **INOX1770** code **INOX1760** code **INOX1257**

Stainless steel covered benches are resistant against corrosion, abrasion and wear. This feature is naturally given by the smooth surface of the stainless steel. The hard and smooth surface of Inox both facilitates the cleaning and constitutes a ground, that prevents the adhesion and reproduction of the bacteria in the air. Due to these features are Inox products used in many areas from durable consumer goods to surgical materials, from automotive to electronic devices.

PVC COATING

code **PVC1770** code **PVC1760** code **PVC2260** code **PVC1257**

PVC is a long lasting, against weather conditions resistant and durable plastic alloy that is produced with the appropriate and necessary additives. Actually, this plastic alloy material is very hard to burn due to the high chlorine content in PVC. Therefore, a separate against fire protecting material is provided due to this feature of PVCs. Beside this, PVC materials are preferred due to being easy to clean and having a long lifetime.

GALVANIZE COVER

code **GZT1770** code **GZT1760** code **GZT2260** code **GZT1257**

Galvanized sheets are produced by the zinc coating of both surfaces of cold rolled sheets by the hot dip method in order to protect the steel against corrosion. Galvanize coating preserves steel against rain, sea water and the humidity in the air and extends the lifetime of the material. Along with having a long lifetime, galvanized materials are easy to sold, can very easily dyed and are resistant against fire and any type of external factors.

ESD COATING

code **ESD1770**

ESD, in other terms antistatic epoxy coating, is preferred in working environments, where electronic production is performed or where electrical energy decreases the efficiency and deteriorates the manufactured product. Antistatic ESD coating is an easy to clean material with a smooth surface and high mechanical resistance. ESD coated benches have anti-dust features, are stainless and water tight. ESD bench coatings are delivered with grounding cables. They have a heat resistant, odour-free structure.

SOLID WOOD WORKTOP

code **MSF1770** code **MSF1760**

Solid wood worktops are plates obtained by the adhesion of single piece or edge to edge attached pieces of small dimensioned massive wood pieces, meaning lamellas, of the same wood type, particularly such that the fibres are in parallel, in the length and width direction into a single layer.
Solid wood worktops are materials with a long lifetime that have a high dimensional stability and resistance along with both being healthy and decorative due to the naturalness of wood.

PLASTIC SEPARATORS

Our separators, designed in order to be used inside the drawers, are available with 3 channels (44mm) and 4 channels (33mm).

The plastic separators are products that are designed in order to prevent a mutual impact of drill bits, milling bits, reamers, diamond cutter bits and similar materials with cutting tip inside the drawers.

DRAWER INTERNAL ORGANIZERS

Our plastic boxes, designed in order to be used inside the drawers, are suitable to create spaces in 3 different dimensions, being 150x150mm, 150x75mm and 75x75mm.

Our boxes are suitable for screws, nuts and smaller spare parts you don't want to mix with each other.

In addition, you can create containers in the desired dimensions inside the boxes.

CNC HOLDER
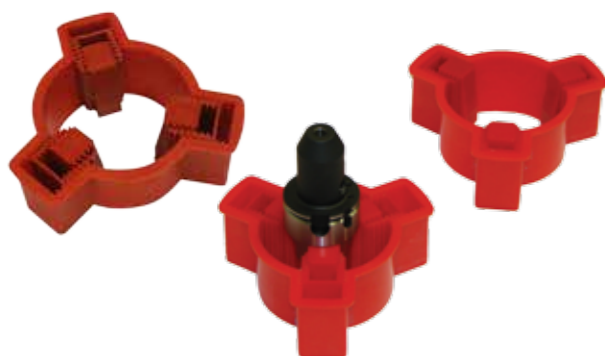

The number and variety of the CNC holders being used at central CNC processing benches is progressively increasing. One face of our plastic holders is suitable for the angles and degrees of SK holder and one face for angles and degrees of HSK holders. We also have apparatus for holders of the Capto series used at new generation high speed machines.

METAL SEPARATORS
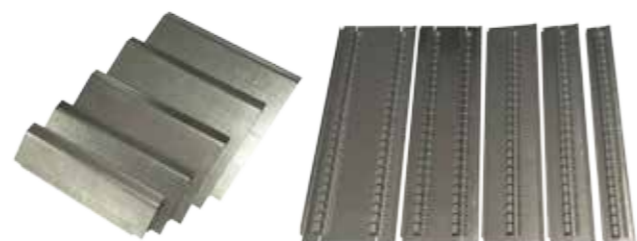

Our metal separators, designed in order to be used inside drawers, are being produced in lengths of 150mm and 200mm, which allow you to generate the size you wish in steps of 17mm. These can be applied to drawer heights from 75mm to 200mm. Different from the plastic separators, they can be applied to the dimensions you desire. For example, you can divide a drawer into 100 or 6 sections. They don't cut hands or constitute any occupational safety risk since the edge bendings are flexible. They are bent with angles for labelling.

LOCK W/ PLASTIC HOUSING

Locks may impact each other and break or harm the products leaned to them during transportation. Therefore, we have placed our locks into plastic housings and left a hand grip in order to serve as a handle. That the locks aren't damaged during handling, don't result in excess sizes, don't need extra material for the handle are the features of this model.

CENTRAL LOCK

It is important that each of the drawers at cabinets with drawers are opened and locked with a single key. This lock has the feature to open and lock all drawers at the same time. The smart system we have involved into our drawers rather facilitates the function of this lock. While one drawer is open, the others will automatically be locked.

PADLOCK SLOT

Suitable for padlocks. The lock will not rotate thanks to the latch inside.

LATCH LOCK

Suitable for 3-point locking. A prop grips to both ends of the latch inside and fixes it to the bottom and top. At the same time, it locks at three points with the latch in itself.

PADLOCK W/ PIN

Suitable for users, who don't want to carry a key. You can ensure the security with the 3-digit password you will determine.

LATCH LOCK

The latch inside is locked with a key.

PRESSURE LOCK

The cylindrical pivot at the tip of the lock will protrude when pressed on and prevent that the sliding door moves left or right and performs thus the locking process.

BRAKE AND SAFETY

Mobility and ergonomy are important at our products, but it is necessary to fix the product position for some processes. For this, you can use the brake apparatus at the wheels.

The locking and releasing process is easily provided when you push on the brake latch with a single foot movement.

SECURITY LATCH

Since safety is very important at products with drawers, the security latch prevents the autonomous opening of the drawers even if the lock system should be opened. Thus, you can easily use your cabinets with drawers on inclined and bad surfaces.

We have applied our latches on the right side for usage easiness purposes. We have taken into consideration to ensure the safety with a single movement.

DRAWERS CAN SPEAK YOUR LANGUAGE

You can customize the drawer handle labels with a couple of steps by the software we developed. You can indicate the materials inside the drawers with the ready-to-use symbols or write the material names you wish to.

Thus, you can avoid material losses and save time by finding the materials you need faster. Enter our Internet site and click on the Label Configurator option, create and print on the opened page your labels. Now drawers are ready to speak the same language with you.
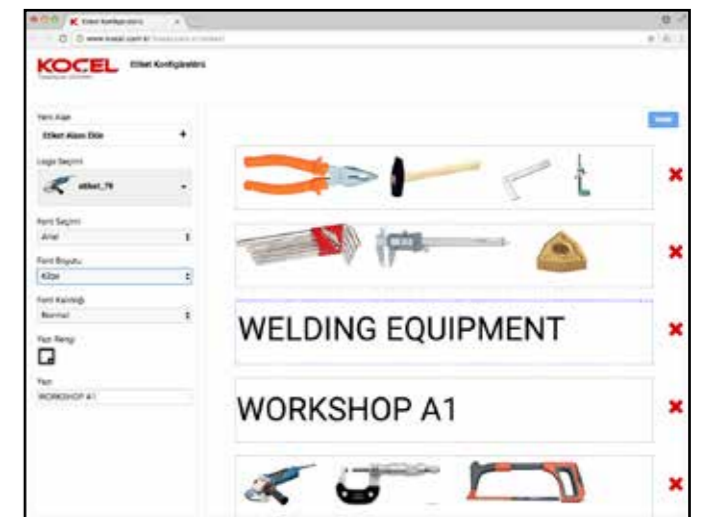

PULLING HANDLE

These facilitate the handling of mobile units. We convert vertical products usable by attaching pulling handles to them.

HANDLING GRIP

We apply our products in a broad range such to be used with 2 hands by handling grips.

SLIDING DOOR HANDLE

We apply embedded handles to the covers at our doors with sliders in order to avoid a restriction of the movement capability.

PULLING HANDLE

Facilitates the handling of mobile products.
We convert horizontal products usable by attaching pulling grips to them.

10 M EXTENSION CABLE

code **UK10**

4 x socket 220 V extension cable. You can provide flexibility in the working environment with this stable and long lifetime model, having a plastic body resistant against impacts and falling.
The risks due to unncessary cables on the floor will be prevented thanks to the non interfering, flowing spool system. It is equipped with a handle and vertical usage allowing feet for easy retraction. The cable spools have a circuit breaker system against overheating.
.

POWER BAR

code **EP15**   code **EP12**

These are used reliably at the electricity, data, image and voice transmission with their sockets at different standards. They provide more plug connections and usage easiness in narrow spaces thanks to the 45 degree inclined poles.
The fact that the lateral hatches can be mounted reverse or straight provides layout easiness for 19" cabinets.

4-WAY AIR JACK

code **HJK4**

4'-Way Air Jack

The 4 x output air jacks for using the air installation at the production areas at the benches are your greatest aid in order to use your different pneumatic hand tools easily and in an ergonomic way.

LIGHTING SYSTEM

code **FTX-120**   code **FTX-170**

Lighting System 1200mm   Lighting System 1700mm

Fluorescent lamps are very widespread used in public areas and workplaces due to their energy saving advantage. Fluorescent lamps, which provide a saving of nearly 75 percent compared with normal lamps, consume less energy and provide more light and have a lifetime of more than the 10-fold of normal lamps. The light is more spread since it comes from every point of the tube and not only a single point and their blueish light is softer and doesn't fatigue the eyes.

LINBIN AND FILE SHELVES

code **AVR17**

Linbin Shelf 1700mm

code **AVR500**

Linbin Shelf 500mm

code **AVR980**

Linbin Shelf 980mm

code **AVS980**

Linbin Sheet 980mm (A150)

The linbin shelves and the file shelves are manufactured of durable steel sheet material, which can be easily assembled to your workbenches. In the linbin shelves can small production materials be tidyly and always available stored in linbins to be used in different sizes and colours.

With the file cabinet shelves for the storage of documents, able to be added into the same environment or as a top shelf solely, space saving is provided for the storage of documents without requiring a separate space.

FILE CABINET W/ SLIDING DOOR

code **SDD900**

File Cabinet w/ Sliding Door 900mm

Our cabinets with sliding covers provide space saving and serve your purpose thanks to their sliders for the storage of materials, folders, documents etc. you want to be in closed environment at your working table.

PPE LOCKER PERSONAL CARE SET

The Personal Care Box we assemble inside the doors of your PPE Lockers allows the employees to store their hygiene care products. The boxes we manufacture from plastic material have a mirror, soap and towel holding apparatus.

VICE

code **KM125**   code **KM150**

Vice 125mm   Vice 150mm

Vices are tools, that are used to grip and hold the piece to be processed. The vice grips the piece with a mouth and prevents that this makes unwanted movements. The vices, offered in the accessory range, are manufactured of high quality forged steel. While a complete tempering is being performed, the jaws and the anvil sections are separately tempered by induction.

WHEELS

code **KTT100**   code **KTT125**

100'er Rubber Wheel Set   125'er Rubber Wheel Set

Rubber Wheels

Rubber wheels protect all hard ground surfaces like parquet, linoleum, vinyl, tile and mosaic. They provide extra protection for sensitive cargos thanks to their feature to absorb vibrations and shocks. These pass easily over hindrances like elevator doors, cables.

code **PU100**   code **PU125**

100'er Polyurethane Coated Polyamide Wheel Set

125'er Polyurethane Coated Polyamide Wheel Set

Polyurethane Coated Polyamide Wheels

Polyurethane coated wheels, forklifts, any type of industrial wheels can be used in automotive, iron-steel, textile, logistics, storage areas and plants. Among the advantages of the polyurethane wheels can high elasticity, perfect wear resistance, high load bearing capacity be mentioned. Beside this, they are resistant against oils, solvents, water, ozone, bacteria and molding.
