

Specialists in 3D profiling

# SPC 500–1200 PT

## Pipe Profiling; Versatile Accuracy

The SPC is a highly accurate pipe cutting machine, which processes a wide variety of materials, sizes and wall thicknesses, making it suitable for all applications. Available with many options, this machine can be customized to suit your needs and requirements.

- 1 Fully customizable to your needs
- 2 Extremely accurate pipe cutting
- 3 Process a wide variety of materials, sizes and wall thicknesses

SPECIFICATIONS	○	📊
➤ SPC 500 PT	48–510 mm [2" – 20"]	8 t
➤ SPC 600 PT	48–610 mm [2" – 24"]	8 t
➤ SPC 800 PT	48–815 mm [2" – 32"]	8 t
➤ SPC 1000 PT	48–1020 mm [2" – 40"]	8 t / 12 t
➤ SPC 1200 PT	48–1225 mm [2" – 48"]	8 t / 12 t

### The self centering

three jaw chuck is one of the factors influencing accuracy. It achieves high accuracy by clamping pipes securely, avoiding slip and creep (longitudinal movement) during rotation.

### The SPC is equipped

with a patented bi-axial cutting head to perform highly accurate 3D cutting routines with both plasma and/or oxyfuel cutting processes.

### Part ID's and contours

of fit parts, for instance, can be marked for rapid and easy fitting of profiled parts.
