

Hand Sanitizer Dispenser

dispenser

MAKING HAND SANITIZERS AVAILABLE IN THE PLACES AND AT THE NECESSARY TIMES IS AN EFFECTIVE WAY TO COMMUNICATE THAT YOU CARE ABOUT PEOPLE'S HEALTH

The column has been designed with integrated brackets that allow its wall mounting, in this case the base has to be removed

Hands free! The distribution of the hand sanitizing gel is automatically activated by a sensor which allows an easy and intuitive use

Thanks to this support it is possible to create a hand sanitizing station in any location. The column is perfect to be placed in the lobbies of high traffic areas such as those of companies, shopping centers, supermarkets, cafes, schools, hospitals and any establishment where it is necessary to fight the spread of germs

Simple and safe: when you place your hands below the hand sanitizer dispenser, a pre-set quantity of disinfectant is dispensed avoiding direct contact with the surfaces

Removable base
