Brokk EX Series

Specialized Brokk machines for the most dangerous environments: The **BROKK EX SERIES**. This new product lineup consists of seven models designed specifically for use in potentially explosive environments. With specialized modifications and equipment, such as explosion-proof electrical cabinets, gas detectors and more, these machines provide a new level of safety and durability in work areas with explosive gas hazards.

All EX machines comply with the ATEX 1994/9/EC directive, classified up to Equipment Class 3G IIA T3. They can be used in what the ATEX directive calls "Zone 2", where explosive gas, vapor or mist may occur. This new capability is especially important for customers working in mining, petroleum and other potentially dangerous industries. The EX Series brings an even higher margin of Brokk safety to all these environments.

- Explosion proof according to ATEX directive
- Ideal for potentially explosive environments
- Same outstanding capabilities as standard Brokk machines
