

MÖRKRET — THE UNCOMPROMISING SURVIVAL KNIFE

Mörkret knife features the largest blade yet. A **full-tang design** - 153mm length and 4.2mm thickness. It is now available in stainless steel, carbon steel, and—for the first time ever in a **Morakniv—stainless Uddeholm Elmax® SuperClean**, engineered for superior edge retention and toughness. Built for the hardest survival and tactical use in the harshest places. Named after the village struck by one of the heaviest downpours in Swedish history, the Mörkret model embodies the spirit of nature in its rawest form. It is built to withstand the toughest survival conditions and tactical missions in the harshest environments.

*The **Mörkret** is designed for those who demand an uncompromising survival knife.*
